APPENDIX C	
APPENDIX D	

I. INTRODUCTION

1. In this Report and Order, the Public Safety and Homeland Security Bureau (Bureau) advances the availability of Wireless Emergency Alerts (WEA) for persons with limited English proficiency. As directed by the Federal Communications Commission (Commission), we require commercial mobile service providers that participate in WEA (Participating CMS Providers) to implement multilingual templates that alert originators can choose to send during life-threatening

emergencies.¹ We adopt templates that represent the eighteen most commonly issued and most time-sensitive types of alerts, which will be available in English and the next 13 most commonly spoken languages in the United States. We promote the flexibility and effectiveness of these templates by requiring Participating CMS Providers to support the ability for alert originators to customize the alerts using event-specific information. In addition, we adopt non-fillable American Sign Language (ASL) templates as signed by a Certified Deaf Interpreter (CDI). Together, these steps further the Commission's goal of ensuring that WEA remains an essential and effective public safety tool that allows alert originators to warn their communities of danger and advise them to take protective action.

II. BACKGROUND

2. WEA is a tool that allows authorized federal, state, local, and Tribal government entities to geographically target alerts and warnings to the WEA-capable mobile devices of Participating CMS Providers' subscribers.² The Warning Alert and Response Network (WARN) Act establishes WEA as a voluntary system in which CMS Providers may elect to participate.³ The WARN Act directs the Commission to adopt "relevant technical standards, protocols, procedures and other technical requirements . . . necessary to enable commercial mobile service alerting capability for commercial mobile service providers that voluntarily elect to transmit emergency alerts."⁴ Accordingly, the Commission has adopted requirements to prescribe WEA capabilities, WEA testing, and WEA election procedures.⁵ While participation by wireless providers is voluntary, those providers that choose to participate must adhere to the technical and operational requirements established by the Commission.⁶

3. In the *2023 WEA Report and Order*, the Commission adopted rules requiring Participating CMS Providers to support multilingual WEA through the use of templates.⁷ Under this approach, when an alerting authority sends a template-based multilingual alert message, the WEA-capable mobile device must be able to extract and display the relevant template in the subscriber's default language, if available. If the default language for a WEA-capable mobile device is set to a language not among those supported by templates, the WEA-capable device must present the English-language version of the alert message.⁸ As a baseline, the Commission required support for templates in the 13 most commonly spoken languages in the United States based on U.S. Census data, American Sign Language, and English.⁹ These 13 languages are: Arabic, Chinese, French, German, Haitian Creole, Hindi, Italian, Korean, Portuguese, Russian, Spanish, Tagalog, and Vietnamese.

¹ *Wireless Emergency Alerts, Amendments to Part 11 of the Commission's Rules Regarding the Emergency Alert System*, PS Docket Nos. 15-94 and 15-91, Third Report and Order, 38 FCC Rcd 10116 (2023) (*2023 WEA Report and Order*).

² See 47 CFR § 10.10(d) (defining a CMS Provider as an "FCC licensee providing commercial mobile service as defined in section 332(d)(1) of the Communications Act of 1934"). Section 332(d)(1) defines the term "commercial mobile service" as any mobile service (as defined in 47 U.S.C. 153) that is provided for profit and makes interconnected service available to the public or to such classes of eligible users as to be effectively available to a substantial portion of the public, as specified by regulation by the Commission. 47 U.S.C. § 332(d)(1).

³ *Warning, Alert, and Response Network Act*, Pub. L. No. 109-347, 120 Stat. 1936 (codified at 47 U.S.C. § 1201 *et seq.*) (WARN Act).

⁴ 47 U.S.C. § 1201(a).

⁵ See generally 47 CFR § 10.2 ("The rules in this part establish the requirements for participation in the voluntary Wireless Emergency Alerts system.").

⁶ See, e.g., 47 CFR §§ 10.2, 10.320-.350, 10.500-.530.

(continued....)

4. The Commission delegated authority to the Public Safety and Homeland Security Bureau (Bureau) to develop specific implementation parameters for template-based multilingual alerting.¹⁰ Specifically, the Commission directed the Bureau to seek comment on which alerts are most commonly used by alerting authorities, which alerts are the most time sensitive and critical for immediate comprehension, the costs of supporting additional languages, whether the English version of the alert should be displayed in addition to the multilingual version, and whether templates could incorporate event-specific information.¹¹ To the extent it is minimally burdensome to implement, the Commission directed the Bureau to designate additional languages that should be supported.¹² The Bureau was also directed to educate mobile device users about how to set the preferred language on devices.¹³

5. In February 2024, the Bureau released a Public Notice (*WEA Multilingual Public Notice*) seeking comments on these issues.¹⁴ In response to the *WEA Multilingual Public Notice*, the Bureau received 28 comments and 8 reply comments. After the close of the comment period, the Bureau received additional feedback by e-mail on the proposed template translations from 16 entities.¹⁵

III. REPORT AND ORDER

A. Templates for Common and Time-Sensitive Emergencies

6. As directed by the Commission, we take steps to implement multilingual WEA by adopting templates to improve the availability of WEA. We require Participating CMS Providers to support multilingual templates for the following eighteen alerts: tornado emergency, tornado warning, flash flood emergency, flash flood warning, severe thunderstorm, snow squall, dust storm, hurricane, storm surge, extreme wind, test alert, fire, tsunami, earthquake, boil water, avalanche, hazardous materials, and 911 outage. We decline to adopt evacuation and shelter-in-place templates and defer consideration of other templates at this time.

7. To determine the most commonly issued alerts, we analyzed publicly available Integrated Public Alert and Warning System (IPAWS) data from 2022 and identified nine alert types that we

<https://data.census.gov/table?q=DP02> (breaking down language speakers in the United States); Sandy Dietrich and Erik Hernandez, *Language Use in the United States: 2019*, at 8, 14-15 (Aug. 2022), <https://www.census.gov/content/dam/Census/library/publications/2022/acs/acs-50.pdf> (*Language Use in the United States*); see also U.S. Census Bureau, *The 2020 Census Speaks More Languages* (Mar. 9, 2020), <https://www.census.gov/newsroom/press-releases/2020/languages.html>. Roughly 78% of the U.S. population primarily speaks English, 13.5% primarily speak Spanish, and 5% primarily speak one of the other twelve languages listed here. *Language Use in the United States*, at 8, 14-15. See also 2023 WEA Report and Order at 12-13, para. 20, note 71 (requiring support for ASL).

¹⁴ Public Safety and Homeland Security Bureau Seeks Comment on Implementation of Multilingual Wireless Emergency Alerts, PS Docket Nos. 15-94 and 15-91, Public Notice, 39 FCC Rcd 1165 (2024) (*WEA Multilingual Public Notice*).

¹⁵ See Submission of Bureau staff, FCC, to Marlene H. Dortch, Secretary, FCC, PS Docket Nos. 15-94 and 15-91 (filed Nov. 21, 2024) (2024 WEA Multilingual Ex Parte); Letter from AnnMarie Killian, CEO, TDI for Access, Inc., and Zainab Alkebsi, Chief Policy Officer, Deaf Equality, to Marlene H. Dortch, Secretary, FCC, PS Docket Nos. 15-94 and 15-91 (filed Dec. 18, 2024) (TDI and Deaf Equality Ex Parte). The 2024 WEA Multilingual Ex Parte contains *ex parte* emails and letters from 15 different organizations and individuals that were submitted to Bureau staff between Sept. 20, 2024, and Oct. 22, 2024. The filers primarily provide feedback on the translations of the multilingual templates. When referencing the 2024 WEA Multilingual Ex Parte in this document, we provide in a parenthetical the name of the party that provided the *ex parte* for clarity.

determined were among the most commonly issued alerts that were appropriate for template alerts.¹⁶ We proposed templates for: tornados, flash floods, severe thunderstorms, snow squalls, dust storms, hurricanes, storm surges, extreme wind, and test alerts.¹⁷ No commenter objected to our analysis or suggested that we failed to identify a common category of alert. We therefore conclude that these emergencies are common enough to merit the creation of multilingual templates to extend the reach of WEA. The National Weather Service (NWS) recommended that we adopt two templates for tornados and two templates for flash floods: one emergency version for each that conveys “the highest threat to life and property” and one warning version for each that provides advance notice of the disaster.¹⁸ We agree that both versions of the tornado and flash flood alerts have different situational uses for notifying the public about the urgency of the emergency, and it would benefit the public for alert originators to have access to both as multilingual alerts. We therefore adopt both the emergency and warning versions of the templates for tornado and flash flood warnings.

8. Similarly, in light of the record, we conclude the most time-sensitive emergencies are: earthquakes, tsunamis, fires, hazardous materials, avalanches, boil water advisory, and 911 outages. In the *WEA Multilingual Public Notice*, we expressed our view that each of these emergencies poses imminent danger to the public and that time is of the essence with respect to taking any protective actions.¹⁹ As no commenters objected to our analysis with respect to earthquakes, boil water advisories, and avalanches being time-sensitive emergencies, we adopt these templates. We adopt the 911 outage template as well, agreeing with APCO International that the template is an additional tool that would be useful to emergency communication centers to inform the public of an outage.²⁰

9. Some commenters argue against the adoption of template-based alerts covering fire warning, tsunami, and hazardous materials emergencies, stating that the appropriateness of the calls to action included in those proposed templates may vary depending on the severity of the emergency, whether the alert is sent during or in advance of the disaster, and location of the recipient in relation to the emergency.²¹ For example, the City of Berkeley argues that the fire warning “will not be used by public officials in California” because the protective action proposed by the Bureau’s fire warning template—to evacuate—does not align with California’s statewide evacuation terminology in which “evacuation warning means prepare to evacuate . . .”²² We disagree. The standard statewide evacuation terminology for California cited by the City of Berkeley describes an “Evacuation Warning” as a “[p]otential threat to life and/or property. Those who require additional time to evacuate, and those with pets and livestock should leave now.”²³ In other words, this terminology does not advise the public to solely prepare for an evacuation, but to begin evacuating. This is consistent with our proposed fire warning template, which also advises the public to evacuate the location that is the subject of the alert. By contrast, California’s terminology describes an “Evacuation Order” as “a lawful order to leave now” as “the area is lawfully

¹⁶ *WEA Multilingual Public Notice*, 39 FCC Rcd at 1167-68, para. 6. The Bureau also sought comment on if and how it should develop template alerts for other commonly issued alerts that typically contain specific information, such as AMBER alerts. *Id.* at 1169-70, para. 8.

²⁰ Letter from Alison P. Venable, Government Relations Counsel to APCO International, to Marlene H. Dortch, Secretary, FCC, PS Docket Nos. 15-94 and 15-91 at 1 (filed Nov. 13, 2024) (APCO *Ex Parte*).

²¹ Sara Lana Comments (rec. Feb. 21, 2024) (filed on behalf of the City of Berkeley, California) (City of Berkeley Comments) (explaining the varying guidance that may be issued during fires and tsunamis); Art Botterell Comments at 7 (describing how the evolution of a hazardous materials release over time may change the guidance provided).

²² City of Berkeley Comments.

²³ California Governor’s Office of Emergency Services, *Evacuation Guidelines | Standard Statewide Evacuation Terminology*, <https://calalerts.org/evacuations.html> (last visited Oct. 23, 2024).

closed to public access.”²⁴ We believe that harmonizing the fire warning template with this “Evacuation Order” language would reduce its flexibility, as emergency managers may wish to advise the public to evacuate a location even if there is no formal government order to do so. We also hesitate to accept the City of Berkeley’s assertion that no alerting official will use the template in the State of California when the State itself has not filed comments that take this position. We expect that emergency managers, including those in California, will be best positioned to determine the applicability and life-saving potential of the fire warning template on a case-by-case basis. We find that fires present a time-sensitive threat to the public and that the adoption of a fire warning alert would be effective at helping emergency managers protect the public from those threats, and therefore we adopt a multilingual template for fire warning alerts.

10. We adopt the proposed hazardous materials release template and a tsunami template for similar reasons. While we agree with observations in the record that conditions related to the release of hazardous materials may change as the emergency further develops—such as a change in the wind that subjects a new geographical location to the threat—such developments do not change the need to warn the public in the affected area of the emergency.²⁵ We adopt the proposed hazardous materials template because it helps provide this warning to the public. In the case of tsunami templates, the City of Berkeley recommends that the Commission adopt two different templates to improve flexibility and avoid confusion with their own emergency policies: a “Tsunami Advisory” template that seeks evacuation of boats, docks, and beaches, as well as a “Tsunami Warning” template that also seeks evacuation of inland locations.²⁶ We disagree with this approach. NWS’s Tsunami Warning alerts, which were the basis for our proposed tsunami alert, advise the public to “Get away from coastal waters. Move to high ground or inland now.”²⁷ Because NWS’s “Tsunami Warnings” advise the public to move inland, rather than evacuate inland areas, implementing the City of Berkeley’s proposed templates would create a conflict with NWS’s alerts and potentially create confusion. We find that avoiding confusion about the meaning of a tsunami alert where they are used nationwide outweighs ensuring consistency of the tsunami template with the City of Berkeley’s emergency policies.

11. We decline to adopt generic templates that would warn the public to either evacuate or shelter-in-place, as initially proposed.²⁸ We agree with commenters that these templates are unlikely to effectively alert the public, risking panic due to their vagueness. As Art Botterell and ATIS note, generic templates instructing the public to take a specific protective action without providing essential details about why the warning was issued would be likely to cause confusion.²⁹ ATIS cites research indicating that such detail, including a description of the threat giving rise to the need to take protective action, is a key component to an effective warning.³⁰ Without this context, we agree with ATIS that recipients of generic alerts are less likely to take action and receiving such a warning may make a situation worse.³¹

²⁴ *Id.*

²⁵ See Art Botterell Comments at 7 (discussing how hazardous material releases can develop and change over the course of time).

²⁶ City of Berkeley Comments.

²⁹ See Art Botterell Comments at 7; Alliance for Telecommunications Industry Solutions Comments at 4 (ATIS Comments).

³⁰ ATIS Comments at 4 (“Without context to justify the need for action, alert recipients are more likely to spend time checking other sources including social media rather than following the instructions.”) (citing Dr. Jeannette Sutton, *Message Design Dashboard (MDD)*, FEMA IPAWS (2023), https://www.fema.gov/sites/default/files/documents/fema_message_design-dashboard.pdf).

³¹ ATIS Comments at 4.

Because of these risks, we decline to adopt generic evacuation and shelter-in-place alerts for use in multilingual WEA.³²

12. We reiterate the Commission’s decision that the multilingual templates we adopt today are optional for use by alerting authorities.³³ In the event an alert originator does not find it appropriate to use the template, they are not obligated to. We agree with Art Botterell’s observation that “[p]ublic warning is an activity in which variation is the rule” and that templates should “aid the alert originator, but never replace her.”³⁴ We acknowledge that templates do not provide a one-size-fits-all solution to every emergency. However, for instances where the template is appropriate to the disaster, the templates are available for use by alert originators to make the warnings more widely accessible to the public. The alerts are also intended to be widely understandable and accessible to the in-language communities they are meant to alert. We find that having a template that supports some emergency situations is a better result than not adopting any templates that could warn the public about those emergencies.

B. Template Language in English

13. In adopting the eighteen templates that warn the public of different types of emergencies, as described above, we now turn to what the templates should say in English. We sought comment on the language that should be used in connection with each template.³⁵ We adopt the English templates located in Appendix C.

14. When we proposed these templates in the *WEA Multilingual Public Notice*, we adapted the language from existing templates used by NWS; social science research; the United States Geological Survey (USGS); language from FEMA used in test alerts; and guidance from the Centers for Disease Control and Prevention (CDC).³⁶ The record supports the conclusion that the templates, on the whole, are generally understandable and will be effective at encouraging the public to take protective action.³⁷

15. Some commenters argue that we should modify some of the templates to improve clarity and effectiveness. We agree with many of those commenters and make minor refinements to the templates to increase their effectiveness. For example, we revise several templates to ensure the sentence

³² The issue of whether Participating CMS Providers should be required to support additional templates, including an “all-clear” template and other templates suggested by commenters in the record, is still under consideration by the Bureau at this time. *See* CTIA – The Wireless Association Comments at 13 (CTIA Comments); ATIS Comments at 5 (opposing an all-clear template). *See also* Language & Accessibility for Alerts & Warning Workgroup Comments at 3 (LAAWW Comments); Art Botterell Comments at 7-8; NWS Comments at 1-3; APCO *Ex Parte* at 2 (generally supporting all-clear templates); National Hispanic Media Coalition Comments at 7-8 (NHMC Comments) (proposing support for templates for “emerging climate disaster events,” such as extreme heat and severe winter storms); New York City Emergency Management Comments at 1-2 (NYCEM Comments) (supporting fillable AMBER alert templates); *2024 WEA Multilingual Ex Parte* at 157-59 (Northern Virginia Resource Center for Deaf and Hard of Hearing People proposing severe cold temperatures, ice storms, and “other emergency warnings.” (NVRC *Ex Parte*)).

³⁴ Art Botterell Comments at 9.

³⁵ *WEA Multilingual Public Notice*, 39 FCC Rcd at 1170, para. 9.

³⁶ *Id.* at 1167-69, paras. 6-7.

³⁷ *2024 WEA Multilingual Ex Parte* at 84 (regarding understandability, New Jersey State Librarian Jennifer Nelson indicates that “[t]he proposed templates do an excellent job of conveying concise information and providing actionable guidance to people in potentially dangerous situations.” (Jennifer Nelson *Ex Parte*)); *see also id.* at 167 (regarding effectiveness, Deaf Equality indicates that the scripted material in the ASL template “is concise yet comprehensive, effectively delivering key information without overwhelming the audience.” (Deaf Equality *Ex Parte*)); *cf.* NYCEM Comments at 1 (“NYCEM agrees with the proposed templates [in the *WEA Multilingual Public Notice*].”).

structure is consistent. We agree with Bridge Multimedia, Inc. (Bridge) that emergency alerts with a consistent, complete sentence structure will aid public comprehension.³⁸ We therefore modify several templates to include a definite article at the start of the alert and the “is in effect” phrase, i.e., “A STORM SURGE WARNING **is in effect for** [LOCATION] . . .”³⁹ We also revise the 911 outage template to remove the [TIME] field because we agree with APCO that many alert originators do not know when an outage will be restored.⁴⁰ We also revise some templates in light of suggestions that the vocabulary was unnecessarily complex or ambiguous.⁴¹ For example, we change the phrase “flying debris” to “flying objects” across several templates where high winds occur as part of the emergency.⁴² We make similar edits simplifying the vocabulary for the purposes of increased public comprehension, such as changing “substantial shelter” to “sturdy shelter” in the tornado templates or “those with respiratory issues” to “those with trouble breathing” in the dust storm template. Similarly, we agree with Bridge that certain phrases were figurative or unclear.⁴³ We make clarifying edits such as changing the phrase “Urgently complete efforts to protect life and property” to “Take steps to protect life and property” in the hurricane and storm surge templates and “Do NOT go out into the calm of the hurricane eye!” to “Do NOT go outside if the wind calms!” in the extreme wind template.⁴⁴ To implement NWS’s recommendation that we adopt emergency and warning versions of the tornado and flash flood templates,⁴⁵ we modify our proposed tornado and flash flood templates to establish two versions that include language treating each emergency with appropriate severity.

16. We reject suggestions from commenters where we disagree that their recommended alternative word or phrase is more accurate, clear, or precise. For example, Bridge argues that the phrase “when visibility drops” in the dust storm template is figurative language; but does not propose an alternate phrase.⁴⁶ We disagree that this phrase would be unclear in the context of the alert as the dust storm template warns to “[b]e ready for a sudden drop to zero visibility.” The protective actions communicated to the public in that alert should be taken “when visibility drops,” e.g., when the visibility drops to or close to zero.⁴⁷ APCO also suggests a revision to the 911 template to include an additional data element of the phone number as a fillable part of the template.⁴⁸ We reject this edit as it would require support for an additional data element for one template, and we believe the inclusion of a URL in these template alerts, as discussed below, provides enough flexibility to alert originators to include specific phone numbers to emergency services through the URL.

³⁸ Bridge Multimedia, Inc. Comments at 3-4 (Bridge Comments).

⁴⁰ APCO *Ex Parte* at 2.

⁴¹ See Bridge Comments at 2-3.

⁴² *Id.*

⁴³ *Id.*

⁴⁴ *Id.*

⁴⁵ NWS Comments at 4.

⁴⁶ Bridge Comments at 3.

⁴⁷ See also *id.* at 2-3 (arguing that the word “DESTRUCTIVE” in the severe thunderstorm alert and “delay travel” in the snow squall alert are more advanced than a third-grade level and arguing that the phrase “strong currents may impact coasts near you” in the tsunami template is ambiguous). While we change the word “impact” to “affect” to reduce ambiguity, we otherwise reject Bridge’s arguments, finding that the meaning of these terms is simple, clear, and appropriately communicates the alert’s urgency. We note that Bridge does not offer alternative language that the Bureau might consider to improve upon those terms.

⁴⁸ APCO *Ex Parte* at 2.

C. Template Language in 13 Additional Languages

17. We adopt the multilingual templates located in Appendix D. In the *WEA Multilingual Public Notice*, the Bureau proposed translations in Arabic, Chinese (Simplified), French, German, Haitian Creole, Hindi, Italian, Korean, Portuguese, Russian, Spanish, Tagalog, and Vietnamese, which were developed through a contracted professional translation service. In addition to the comments submitted into the record, the Bureau worked with the Consumer and Governmental Affairs Bureau to acquire feedback from native language speakers and communities representing the populations these alerts are intended to reach. We received feedback on these templates from language teachers and members of local, state, and national organizations representing communities of language speakers.⁴⁹ The comments we received were evaluated with the assistance of the Commission's contracted professional translation services.⁵⁰ Based on this feedback, we adopt templates in the written forms of the 13 most commonly spoken languages in the United States after English. Accordingly, as required in the *2023 WEA Report and Order*, when an alerting authority chooses to send a template-based multilingual alert message, the WEA-capable mobile device must be able to extract and display the relevant template in the subscriber's default language, provided that the default language is one of the 13 languages that we adopt templates for today.⁵¹

18. In requiring support for these templates, we make conforming edits to reflect the changes to the English versions that are discussed above. All commenters on the proposed Haitian Creole, Hindi, and Russian templates agreed that they were accurate and clear as written.⁵² We also did not receive any feedback on the proposed Arabic, Portuguese, or Italian templates. Because no commenter identified any sources of confusion or inaccuracy, we adopt the Arabic, Haitian Creole, Hindi, Italian, Portuguese, and Russian templates with only minor changes developed in consultation with the Commission's contracted professional translation service to further improve clarity.

19. Commenters recommended revisions to the Chinese, German, Tagalog, Vietnamese, French, Korean, and Spanish templates. In considering these recommendations in consultation with the Commission's contracted professional translation service, we make changes to the templates that correct errors, simplify phrasing, avoid awkwardness, improve readability, and increase comprehension.⁵³ We

⁴⁹ E.g., *2024 WEA Multilingual Ex Parte* at 85-88 (Ysleta Independent School District (*YISD Ex Parte*)); *id.* at 8-10 (Worcester Senior Center (*Worcester Ex Parte*)); *id.* at 150-55 (League of Korean Americans (*LoKA Ex Parte*)); *id.* at 168-69 (Louisiana Chamber of Commerce Foundation (*LCCF Ex Parte*)); *id.* at 173-74 (*HTTP Ex Parte*).

⁵⁰ See, e.g., John Bobel Comments ("[I]t is my experience that an experienced human translator will be required to ensure message correctness and emphasis[.]").

⁵¹ *2023 WEA Report and Order*, 38 FCC Rcd at 10124, para. 14. The Commission does not require WEA-capable devices to newly add default language support for these 13 languages. *See id.* ("WEA-capable mobile device must be able to extract and display the relevant template in the subscriber's default language, *if available*." (emphasis added)). However, for the 13 languages, WEA-capable devices that allow the subscriber to select one or more of these languages as the default language must also support the display of WEA templates for those languages. The Bureau notes the Commission's guidance that ASL alerts operate differently than the 13 other languages. *See id.* at 10128, para. 20 ("... ASL is not a language to which a mobile device can be set. Because of this, we require Participating CMS Providers' WEA-capable mobile devices to provide subscribers with the ability to opt-in to receive ASL alerts.").

⁵² *2024 WEA Multilingual Ex Parte* at 169 (regarding Haitian Creole and Hindi, the LCCF *Ex Parte* provides that their translators identified no errors in the messages); *id.* at 3 (regarding Russian, the Russian Heritage Society provides that the messages warn about different conditions clearly).

⁵³ *See 2024 WEA Multilingual Ex Parte* at 6-7 (Chinese Community Federation of Atlanta suggesting edits to the Chinese templates (*CCFA Ex Parte*)); *id.* at 9-10 (*Worcester Ex Parte* suggesting edits to the Chinese templates); *id.* at 185-188 (Alma Robichaud suggesting edits to the Tagalog templates (*Robichaud Ex Parte*)); *id.* at 176-183 (BPSOS, Inc. suggesting edits to the Vietnamese templates (*BPSOS Ex Parte*)); *id.* at 9-10 (*Worcester Ex Parte* suggesting edits to the Vietnamese templates); *id.* at 9-10 (*LCCF Ex Parte* approving the French templates with no (continued....)

reject some changes to the templates offered by commenters that would introduce confusion, make the templates more difficult to read, or diverge from the meaning of the English template.⁵⁴ We also reject the revisions of commenters that translated the fillable fields,⁵⁵ as the contents of those fields will be decided upon by the alert originators that send template alerts and will not be translated, as discussed below.

20. We resolve the outstanding questions related to Chinese, Portuguese, and Tagalog that were raised in the *WEA Multilingual Public Notice*.⁵⁶ In addition to adopting templates written in simplified Chinese, we also adopt templates written in traditional Chinese. We agree with NWS and New York City Emergency Management (NYCEM) that support of templates in traditional Chinese will maximize the accessibility of WEA due to the nuanced differences between simplified and traditional written Chinese.⁵⁷ We adopt templates in the Brazilian dialect of Portuguese and decline to adopt the European dialect of Portuguese in the absence of commenters suggesting a different course.⁵⁸ We affirm our belief in the *WEA Multilingual Public Notice* that it is appropriate to satisfy the Tagalog translations using Filipino due to no concerns raised by reviewers of the Filipino templates that commented in this proceeding.⁵⁹

D. Supporting Fillable Templates

21. In the *WEA Multilingual Public Notice*, the Bureau sought comment on whether fillable templates were technically feasible and whether they would improve the templates' flexibility and effectiveness.⁶⁰ Today, we require Participating CMS Providers to support fillable templates that can include event-specific information. Accordingly, we adopt fillable versions of the multilingual templates for English and the written forms of the 13 most commonly spoken languages in the United States. The fillable templates contain blank fields that will allow alert originators to insert the name of the sending agency ([SENDING AGENCY]), the name(s) of the geographic area(s) pertaining to the alert message ([LOCATION]), the time when the emergency conditions described in the alert are expected to end ([TIME]), and, if included by the alert originator, a URL ([URL]).

corrections); *id.* at 85-88 (YISD *Ex Parte* suggesting edits to the French templates); *id.* at 150-55 (LoKA *Ex Parte* suggesting changes to the Korean templates). Four commenters provided feedback on the Spanish templates. See *id.* at 174 (HTTP *Ex Parte* recommending edits to improve cultural awareness); *id.* at 9-10 (LCCF *Ex Parte* approving the Spanish templates as written); *id.* at 67-72 Mary's Center suggesting edits to generally use simpler vocabulary (Mary's Center *Ex Parte*). We note that NHMC submitted two sets of feedback. The Bureau reviewed both sets of feedback and determined that, in general, the second set of feedback provided suggestions that were more succinct without sacrificing meaning, which is more appropriate for use in WEA. As such, in editing the Spanish templates, the Bureau gave preference to the second set of NHMC Comments. Compare NHMC Comments (rec. Apr. 8, 2024) at Appx. A with the 2024 *WEA Multilingual Ex Parte* at 189, 240-48 (NHMC *Ex Parte* suggesting edits to the Spanish templates).

⁵⁴ For example, we find that the formal conjugations are more appropriate for messaging sent by alerting authorities to the community than informal conjugations. Compare *infra* Appx. D with 2024 *WEA Multilingual Ex Parte* at 189, 240-248 (rejecting recommended changes by NHMC *Ex Parte* that used informal conjugations in favor of formal forms). We also reject edits that make alerts longer when shorter, equally precise alternatives were available; where edits introduced repetition; and where they changed the meaning of the alert. *Id.*

⁵⁵ See 2024 *WEA Multilingual Ex Parte* at 176-83 (BPSOS *Ex Parte*).

⁵⁹ See *WEA Multilingual Public Notice*, 39 FCC Rcd at 1170, para. 10; Alma Robichaud Comments. See also NWS Comment at 1 (noting that the census data groups Tagalog and Filipino together).

⁶⁰ *WEA Multilingual Public Notice*, 39 FCC Rcd at 1172-73, paras. 16-19.

22. The majority of commenters in the record argue that fillable templates best serve the public. CTIA and LAAWW agree that static templates are less useful because they do not contain event-specific information sufficient to effectively warn the public.⁶¹ We agree with Hamilton Bean that fillable templates, on the other hand, which include “source, location, and time,” are “critical elements” for optimal WEA messages.⁶² Further, event-specific information “contribute[s] to personalization and, thereby, to the effectiveness of the warnings.”⁶³ LAAWW supports the Bureau’s proposal of the four fillable elements, as “[e]vent-specific information is extremely beneficial to the public.”⁶⁴ We agree with commenters that the fillable fields allow alert originators to provide more complete, detailed information when they alert the public, and that this information would better equip the public to understand and respond to the alert. For these reasons, fillable templates are more likely to be used by alert originators because alert originators will be able to provide more information to the communities they serve. Because we agree with commenters that fillable templates allow more flexibility, including the option of providing a URL⁶⁵, and because no commenter defends the static templates as a more effective alerting tool over the fillable templates, we adopt the fillable templates for use in multilingual WEA.

23. We conclude that fillable templates are technically feasible for non-ASL multilingual alerts. We agree with ATIS that fillable templates are technically feasible, even though they are more technically complex than static templates.⁶⁶ CTIA discusses several issues that would need to be resolved during the design process for fillable templates, but does not assert that fillable templates are technically infeasible.⁶⁷ For example, CTIA states that standards bodies would need to create a protocol for any fillable fields not completed or improperly formatted by the alert originator to ensure the alert is not transmitted with blank spaces so as to not confuse individuals who receive the alert.⁶⁸ ATIS explains that the fillable approach may not be feasible on legacy devices, as new information elements not recognized by legacy devices are commonly ignored and result in processing the alert as it currently exists.⁶⁹ ATIS states that the exact extent of the effect on legacy devices would need to be determined during the design process.⁷⁰ FEMA agrees that fillable templates will require time to make sure all technical issues are

⁶⁹ ATIS Comments at 8.

⁷⁰ *Id.*

addressed.⁷¹ We agree that there are certain key technical issues to work through during the standards development process, but disagree insofar as commenters suggest these are barriers to adopting fillable templates that cannot be overcome.

24. We do not require the fillable elements in the multilingual versions of the templates to be translated into that template's language. The record supports the conclusion that translating the contents of the fillable fields could "increase confusion," particularly in languages read right to left or that have different grammatical structures than English.⁷² In addition to not needing to be translated, we agree with CTIA that dynamically translating the fillable fields would be technically infeasible at this time.⁷³

25. While we require Participating CMS Providers to support templates that enable alert originators to insert the four fillable elements when originating an alert, we find that the WEA standards development process, which should include alert originators among its participants, is the appropriate venue to decide upon the technical implementation details for these fillable alerts. For example, we defer to the standards process to determine how the [TIME] field should be populated and formatted, including whether it should include the capability to display dates as well as the hour and minute to better reflect emergencies that carry over from one day to the next day, such as an overnight severe weather event.⁷⁴ While we also defer to the standards process to determine how the [LOCATION] field should be structured, we strongly encourage support for free-form text to grant alert originators maximum flexibility in identifying the names of cities, towns, streets, or significant landmarks that may be effective references for the locations of emergencies.⁷⁵ This is particularly true for situations where a county may be divided along larger geographical features, such as Maui County that consists of several islands. We also expect that the standards process will consider how the [LOCATION] field will be augmented by upcoming WEA functionalities such as location-aware maps.⁷⁶ We also defer to the standards process and alerting software vendors to determine the best way for alert originators to be presented with the option to send a multilingual WEA, and how the alert originator will be presented with the ability to fill in the templates, including the name of the sending agency and a URL, if desired.⁷⁷ Ultimately, however, the technical implementation of fillable alerts must ensure that alert originators' filled templates are received on WEA-capable handsets consistently, accurately, and in accordance with the requirements established in the Commission's *2023 WEA Report and Order* and this Report and Order.

26. We reiterate that the 30-month time frame the Commission determined was reasonable to implement templates applies to implementing fillable templates. The Commission allowed 30 months to implement the changes to WEA adopted by the Commission in 2016, which was inclusive of the amount

⁷¹ FEMA *Ex Parte* at 5.

⁷² ATIS Comments at 8 ("Contents of the fillable fields often do not require translation or cannot be translated and any attempted translations could increase confusion for the user[.]"); *see also* NYCEM Comments at 4; CTIA Comments at 16.

⁷³ CTIA Comments at 16.

⁷⁴ *See* NWS Comments at 2 (explaining that "NWS created a [Common Alerting Protocol (CAP)] <eventEndingTime> parameter which reflects the expected end time of the event in the alert message. For short duration alerts, the <expires> and <eventEndingTime> values are typically the same. For longer duration alerts, the values are not the same. Therefore, plugging the NWS CAP <expires> time into a template for longer duration alerts could provide misleading information about the end time of the alert.").

⁷⁵ Cf. NYCEM Comments at 1 (arguing that the ability to include "specific location information such as address, intersection, or general radius" would benefit alert originators and the public).

⁷⁶ *See 2023 WEA Report and Order*, 38 FCC Rcd at 10132-33, para. 30 (adopting location-aware maps in WEA-capable mobile devices).

⁷⁷ *See* ATIS Comments at i (noting that changes to the Common Alerting Protocol will be required to support the inclusion of URLs).

of time needed to make technical changes to WEA if needed.⁷⁸ Further, the Commission has previously required more aggressive implementation timelines for the Commission’s enhanced geotargeting requirements—which necessitated changes to WEA standards, network updates, testing, and deployment—to be completed within 22 months.⁷⁹ As the Bureau has acknowledged, the 30-month timeline that the Commission determined was appropriate to implement templates also includes the time necessary to update standards, design, develop, and deploy the templates.⁸⁰

27. Although the Commission has considered the issue of implementation timelines and determined that 30 months is achievable,⁸¹ CTIA and ATIS argue that the fillable templates cannot be implemented within 30 months.⁸² We find that the implementation steps that they describe fall within scope of actions that were already considered by the Commission when setting the 30-month implementation timeframe. CTIA argues that our analysis in the *WEA Multilingual Public Notice*, which was drawn from the Commission’s analysis in the *2023 WEA Report and Order*, did not account for “substantial standards efforts to determine the feasibility and cost to support templates,” such as signal triggers, network capacity constraints, the needs of device manufacturers to utilize storage space, and the creation of new software.⁸³ As a result, CTIA says, “the timelines proposed in the Public Notice will be insufficient to achieve the end-to-end design, testing, and integration required to support templates.”⁸⁴ ATIS states that more time than 30-months is needed for “the more complex design required for fillable templates,” including updates to ATIS standards, 3GPP specifications, development, and testing.⁸⁵ However, all of these concerns fall within the Bureau’s analysis that Participating CMS Providers will need to consider “storage, standards, processes, and devices” to implement fillable templates,⁸⁶ as well as the Commission’s prior analysis that set the 30-month deadline while considering ATIS’s view at the time that “any new data element in alert message metadata that would trigger the display of a template would require standards, design, development, and deployment efforts.”⁸⁷ Further, CTIA and ATIS fail to explain *why* these specific aspects of implementing multilingual templates cannot be completed within 30 months.⁸⁸ Lacking timelines supported by evidence that distinguish the costs of fillable templates, it is

⁷⁸ See *Wireless Emergency Alerts; Amendments to Part 11 of the Commission’s Rules Regarding the Emergency Alert System*, PSHB Docket Nos. 15-94 and 15-91, Report and Order and Further Notice of Proposed Rulemaking, 31 FCC Rcd 11112, 11161-62, para. 79 (2016) (*2016 WEA R&O*) (requiring support of Spanish-language alerts, embedded references, 360-character maximum alerts, and other enhancements within 30 months).

⁷⁹ See *Wireless Emergency Alerts; Amendments to Part 11 of the Commission’s Rules Regarding the Emergency Alert System*, PS Docket Nos. 15-94 and 15-91, Second Report and Order and Second Order on Reconsideration, 33 FCC Rcd 1320, 1331-32, para. 14 (2018) (*2018 WEA R&O*).

⁸⁰ *WEA Multilingual Public Notice*, 39 FCC Rcd at 1178-79, para. 33 (“The implementation of static templates would also require software development, testing, and deployment, which are the same processes that would be needed to implement fillable templates.”).

⁸¹ See *2023 WEA Report and Order*, 38 FCC Rcd at 10130-32, paras. 25-27.

⁸² ATIS Comments at 10-11; CTIA Comments at 17-18.

⁸³ CTIA Comments at 17-18.

⁸⁴ *Id.* at 17.

⁸⁵ ATIS Comments at 11. See also Consumer Technology Association Reply Comments at 2 (sharing CTIA and ATIS’s concerns about the technical implementation of fillable templates); T-Mobile Reply at 2-3 (supporting ATIS’s comments that the 36-54 months are needed to implement templates).

⁸⁶ *WEA Multilingual Public Notice*, 39 FCC Rcd at 1178-79, para. 33.

⁸⁷ *2023 WEA Report and Order*, 38 FCC Rcd at 10130-31, para. 26.

⁸⁸ In arguing that the Commission’s *2023 WEA Report and Order* did not provide enough time to implement multilingual templates, ATIS states that enhancements for multilingual WEA will require “very similar network and device support” to other WEA enhancements that it described in a letter previously filed with the Commission. See (continued....)

unclear how the technical concerns raised would lead us to agree with the 36-54 month timeline asserted by ATIS and CTIA. Further, we agree with the commenting Attorneys General about the need to make multilingual WEA “a reality for the public as soon as is technologically possible” due to the threat extreme weather poses to the public, and particularly to those who do not speak English.⁸⁹ Therefore, we reiterate the Commission’s determination that Participating CMS Providers must implement form-fillable multilingual templates for English and the next 13 most commonly spoken languages in the United States—as well as non-fillable ASL templates, discussed below—within 30 months after the publication of today’s Report and Order in the *Federal Register*, consistent with the Commission’s 2023 *WEA Report and Order*.

E. Supplementing Multilingual Templates with English Templates

28. In response to comments suggesting that the multilingual templates should appear alongside the English versions to promote a fuller understanding of the nature of the emergency, the Commission directed the Bureau to seek comment on the benefits and technical feasibility of displaying the English template alongside the multilingual template.⁹⁰ We are persuaded by the record to require WEA-capable mobile devices to accompany the display of templates for the written forms of the 13 supported languages with the corresponding English-language fillable template. In all cases, we require the non-English alert to appear first so that the recipient initially sees the alert in the language in which they have configured their device.

29. On review of the record, we believe that always displaying the English template enhances the overall public safety value of the alert. We agree with NWS that the non-English template should be presented first.⁹¹ We find that this approach is likely to be consistent with the expectations of recipients that have set the default language settings of their WEA-capable mobile device to one of the 13 supported languages other than English. We also agree with NWS that always displaying the English template after the non-English template could help eliminate confusion about the meaning of an alert and raise public awareness of how alerts are translated.⁹² Some multilingual users, for example, may have sufficient English proficiency such that seeing the English message in close proximity to the multilingual alert would help the multilingual user associate the non-English word with the corresponding English vocabulary word for the emergency. This exposure may be important, especially in circumstances where other members of the public in the surrounding physical environment or on the ground emergency personnel may not speak the language in which the mobile device user receives the alert, but may be

ATIS Comments at 11, n.27 *citing* Letter from Thomas Goode, General Counsel, ATIS, to Marlene H. Dortch, Secretary, FCC, PS Docket Nos. 15-91 and 15-94 (filed Feb. 5, 2024) (*ATIS Ex Parte*). However, we find that the timelines set out in the *ATIS Ex Parte* themselves lack evidence. For example, ATIS asserts that the implementation of symbols or infographics in WEA would require six months for high-level design, 18-24 months for completion of specification work, and 12-24 months for development, testing, and deployment. *ATIS Ex Parte* at 3. While ATIS includes tables that identify each step that it believes must occur to implement this WEA enhancement, it also assigns timeframes for each of these steps without offering any explanation of how those timeframes were determined or why the Commission should find them to be reasonable. *See id.* at 5-7.

⁸⁹ Attorneys General of New York, Connecticut, District of Columbia, Illinois, Maryland, Massachusetts, Minnesota, Nevada, New Jersey, New Mexico, Oregon, Rhode Island, Vermont, Washington, Wisconsin, and the City of New York Reply at 3 (Attorneys General Reply Comments).

⁹⁰ 2023 *WEA Report and Order*, 38 FCC Rcd at 10129, para. 22.

⁹¹ NWS Comments at 2.

⁹² *Id.* at 2; *see also* ATIS Reply at 2. ATIS opposes a rule requiring the non-English alert to appear first, noting that accommodating a specific order would increase the technical complexity of the device. *Id.* However, ATIS does not quantify the degree of this technical complexity. We find that the benefit to the user in seeing the alert in the language they expect to see in an emergency outweighs the technical complexity in requiring the non-English alert to be displayed first.

actively taking the same protective actions and responding to the disaster.⁹³ For these reasons, we believe that displaying non-English and English alerts together will be beneficial even if the templates provide the same message.⁹⁴ Further, we agree with CTIA that requiring the English message to appear alongside the multilingual template serves as an important public safety redundancy, and will further ensure that legacy devices that may not be able to display a multilingual alert will at minimum display the English alert.⁹⁵ We also agree with ATIS that displaying the English and multilingual versions together are technically feasible.⁹⁶

30. We find that these positive benefits of presenting non-English and English templates together outweigh any theoretical negative effects. Commenters do not identify specific drawbacks to displaying both templates, and the record does not suggest what negative effects, if any, could arise from displaying the templates in this way.⁹⁷ Previously, the Commission determined that the public safety value of integrating location-aware maps into WEA outweighed concerns that there had not been research into whether the public would be confused by receiving a location-aware map because mapping applications are already familiar to and widely used by the public.⁹⁸ Similarly, we find today that the public currently receives WEA messages and is familiar with their purpose.⁹⁹ The Bureau does not see a reason why receiving a multilingual alert in the language the user has set their mobile device to, followed by an English alert, would confuse the public.

F. Templates in American Sign Language

31. We require Participating CMS Providers to support non-fillable ASL templates—that is, video files of the alert messages in ASL that do not include the fillable elements described above. TDIforAccess, Inc., filing jointly with other organizations representing the deaf and hard of hearing community (TDI), acknowledges the technical challenges related to implementing ASL templates for WEA, but believes that “technical and logistical challenges” should not stop the Bureau from acting due to the need to make WEA accessible for the deaf and hard of hearing community.¹⁰⁰ Ricky Harris, a resident of Houston, Texas who is deaf, expresses that the deaf and hard of hearing community “is left uninformed, vulnerable and at-risk during emergencies” and “urge[s] the FCC to take decisive action to

⁹³ See NYCEM Comments at 3 (“We agree with commenters that accompanying the multilingual alert with English can help provide the recipient with greater context and overall comprehension.”).

⁹⁴ Hamilton Bean Comments at 2 (“If the English language version of the alert is the ‘live’ version, it could provide helpful details to those who understand them, but it could also spark confusion concerning why the non-English version of the message is incomplete.”); CTIA Comments at 16 (“CTIA urges the Commission to require that the detailed English or Spanish alert always accompany use of any [template]. . . . Further, the detailed alert will contain additional details . . . such as the end time.”); ATIS Comments at 5-6 (supporting the presentation of both versions of the template alongside one another because the English version would include event specific details).

⁹⁵ CTIA Comments at 16.

⁹⁶ ATIS Comments at 6.

⁹⁷ See FEMA *Ex Parte* at 4 (urging further assessment and stating that it is “currently unknown” how the public would respond to an English message alongside a non-English message, but not identifying any likely concrete harms that would occur from displaying both messages together).

⁹⁹ Homeland Security Operational Analysis Center, Assessing Public reach of the 2023 National Test of the Wireless Emergency Alerts (WEA) System at vi, https://www.rand.org/pubs/research_reports/RRA2451-1.html (RAND Report) (“An estimated 91% of adults in the United States received the national test alert.”).

¹⁰⁰ TDI Reply at 4; Letter from Maria Elena Villasante, Lincoln-Lancaster County Health Department, to Marlene H. Dortch, Secretary, FCC, PS Docket No. 15-91 (rec. Jun. 13, 2024) (*Lincoln-Lancaster Ex Parte*) (The FCC should provide alerts in ASL to “[e]nsure that WEA alerts are accessible to individuals with disabilities, including those who are deaf or hard of hearing.”); cf. Scott Plummer Comments at 1 (describing current hardships faced by the deaf community in receiving alerts).

ensure accessibility in emergency alerts of all [deaf and hard of hearing] individuals.”¹⁰¹ While we agree with TDI that we should move forward with these essential multilingual messages for the deaf and hard of hearing community,¹⁰² we also must agree with CTIA that fillable ASL templates are not technically feasible at this time.¹⁰³ We find that the best approach that current technology allows is to support ASL through the implementation of non-fillable templates.

32. We adopt the ASL templates located in Appendix D.¹⁰⁴ Commenters raise several issues with the proposed templates in the *WEA Multilingual Public Notice*, which we address in the ASL templates we adopt today.¹⁰⁵ Specifically, commenters say the ASL templates should prioritize ASL grammatical structures; limit the use of fingerspelling except when absolutely necessary; use facial expressions that are consistent with urgent, lifesaving information; and prioritize conceptual accuracy, as opposed to parallel lexical choices to the English.¹⁰⁶ Commenters resoundingly support the use of a CDI to conduct ASL translations, and believe that utilizing a CDI will correct these issues because “CDI’s possess the cultural and linguistic competencies essential for delivering and understanding emergency messages effectively.”¹⁰⁷ Further, a CDI will “ensure translations are linguistically accurate, conceptually precise, and culturally appropriate.”¹⁰⁸ We agree with these comments and require Participating CMS Providers to support the implementation of these newly developed templates, which are signed by a CDI to ensure that the translations adhere to “ASL [l]inguistic and [c]ultural [n]orms.”¹⁰⁹ Because the new translations address the issues identified by commenters in the record, we adopt them today.

33. To supplement the non-fillable ASL templates, we require WEA-capable mobile devices to accompany the display of these templates with the fillable template for the alert originator’s alert in English, as is required for the written forms of the 13 supported languages. As explained above for other languages, we believe that including the fillable English template will enhance the public safety value of the alert. Georgia Tech indicates that follow-up messaging containing customized information can be effective since such messaging “will allow emergency managers to provide . . . information that addresses the needs of the community.”¹¹⁰ We agree, and believe including the fillable English template after the ASL alert strikes the best balance between addressing the needs of the deaf and hard of hearing

¹⁰⁹ *Id.*

¹¹⁰ Georgia Tech Comments at 15-16.

community, supporting the ability for alert originators to include information tailored to the emergency through fillable templates, and acknowledging the existing technical capabilities.

34. We reject changes to the underlying content of the ASL templates, finding that their substance should match that of templates in other languages. We agree with Deaf Equality that the alert content itself is paced well enough to allow for comprehension, and is “concise yet comprehensive, effectively delivering key information without overwhelming the audience.”¹¹¹ We disagree that the messages contain too much information such that the alerts must be shortened, as NVRC urges.¹¹² The Bureau finds that it is important to ensure that people who are deaf and hard of hearing receive the same information as others during an emergency and that the retranslated alerts are sufficiently short and clear to communicate necessary information. We decline to include pictures or other visual aids in the alert, as these inclusions would lengthen the alert and are unnecessary due to the improved clarity of the alert by utilizing a CDI.¹¹³ We also decline to include captions in the ASL video templates, as some commenters suggest.¹¹⁴ Because the CDI-produced templates prioritize ASL grammatical structures—consistent with the recommendations in the record—captions in proper English grammar would not contemporaneously match the information as presented in ASL, and this dissonance could cause confusion in an emergency situation. Further, the need for English captions is mitigated because we require the fillable English version of the template to be displayed following the ASL template.

G. Support for Additional Languages

35. The Commission delegated the authority to the Bureau to seek comment on the costs of supporting additional languages and to designate—to the extent it is minimally burdensome to do so—additional languages that should be supported with multilingual templates in WEA.¹¹⁵ While commenters were interested in expanding the languages for support and offered many suggestions, the record presented no guiding principle for how the Bureau should select additional languages at this time.

36. The Bureau sought comment on different approaches to selecting languages in the *WEA Multilingual Public Notice*. The Commission previously noted that commenters suggested different approaches for identifying additional languages for support.¹¹⁶ The Bureau sought comment on each of these approaches: for languages spoken by at least 300,000 people in the U.S. over five years old; any additional languages with an estimated 25,000 individuals over the age of five with “especially high” rates of limited English proficiency (LEP); how to address the needs to local jurisdictions in the nationwide system of WEA; or other approaches, such as that used by the Census Bureau in selecting languages spoken by at least 2,000 LEP households.¹¹⁷ The Bureau notes that the languages the Commission has already adopted for support in WEA have a wide variance in LEP rates of speakers who speak English “not well” or “not at all,” making it difficult to determine using LEP rates alone which languages are most ripe for additional support.¹¹⁸ Further, the five most frequently spoken languages in

¹¹⁷ WEA Multilingual Public Notice, 39 FCC Rcd at 1175-77, para. 25.

¹¹⁸ Language Use in the United States at 8.

U.S. homes other than English are already included in the adopted list of languages.¹¹⁹ The Bureau sought comment on which approach (or multiple approaches) should be used, and any factors that should be considered.¹²⁰ In particular, we asked how to “assess what constitutes a high rate of [LEP].”¹²¹ The Bureau also sought comment on whether mobile devices are able to support additional languages.¹²² No commenter addressed the device issue, nor did we receive clear information from commenters that addressed which LEP benchmarks were appropriate to use, if at all.

37. To provide an example, NWS’s comments discuss its work on multilingual translation “on languages with populations above 200,000 people that reported speaking English ‘less than very well’ (the LEP population).”¹²³ NWS focuses on languages with an LEP-to-total speaker ratio above 35%.¹²⁴ NWS’s comments list ten languages it is working to support that meet this criteria: all of which are included in the languages the Commission adopted for support and we provide templates for today, except for Somali.¹²⁵ NWS does not urge the Bureau to include Somali or to adopt the criteria it uses; instead, it urges the Bureau to consider supplemental criteria to support languages in states with “other dominant, non-English languages specific to those states and territories that don’t meet the criteria used by either the FCC or NWS.”¹²⁶ These languages are Samoan (spoken widely in American Samoa), Chamorro (spoken widely in the Commonwealth of the Northern Mariana Islands), and Ilocano (spoken in Guam and Hawaii). And while the Bureau agrees that expanding WEA’s accessibility to “other dominant, non-English languages” is important, these criteria could be applied to include any number of other languages in other states, Tribal lands, and territories aside from what NWS urges. NWS does not explain how it arrived at these languages to the exclusion of other significant regional languages in other parts of the United States. As a result, NWS’s suggestion does not empower us to set sufficient, specific criteria for identifying other languages that WEA should support.

38. The suggested standard offered by both the Oregon DEMAC and LAAWW also does not resolve the question of how to choose an appropriate benchmark for selecting additional languages. LAAWW argues that “[i]t is important to use the languages list derived from the Federally mandated Factor 1 demographic analysis” as it “represents languages spoken by people who identify as limited English proficient.”¹²⁷ Neither LAAWW nor Oregon DEMAC cite to the list they reference, but we presume this standard references the U.S. Department of Transportation’s (DOT) four-factor analysis to determine whether materials are meaningfully accessible to LEP persons.¹²⁸ The first factor, the factor we believe referred to, includes “[t]he number or proportion of LEP persons eligible to be served or likely to be encountered by a program, activity, or service of the recipient . . .”¹²⁹ The Bureau conducted the analysis following the steps provided by the DOT, utilizing Census data with a national scope due to

¹¹⁹ Sandy Dietrich and Erik Hernandez, *What Languages Do We Speak in the United States* (Dec. 6, 2022), <https://www.census.gov/library/stories/2022/12/languages-we-speak-in-united-states.html> (citing 2019 data indicating the five most frequently spoken languages other than English in U.S. homes are: Spanish or Spanish Creole; Chinese; Tagalog; Vietnamese; and Arabic).

¹²⁹ *Id.*

WEA's national reach.¹³⁰ The resulting data from this analysis identifies languages for which we already adopt templates in this Report and Order and categories of aggregated language families that prevent us from identifying the specific languages that should be supported (e.g., identifying specific languages from "other Asian and Pacific Island Languages" family and their LEP rate).¹³¹ Further, the analysis itself does not provide a way to determine which rates of LEP are significant for purposes of multilingual WEA support. Because we do not have enough information from the record to determine what the appropriate LEP benchmark should be—and thus which languages should be supported that meet the benchmark—we find LAAWW and Oregon DEMAC's suggestion also does not allow us to determine which additional languages should be supported.

39. Other commenters urge adoption of additional languages, but similarly do not offer a principle for why some languages should be added to the exclusion of others. Restoring Dignity urges adding the following languages: Burmese, Dari/Farsi, Karen, Kiswahili/Swahili, Nepali, Pashto, Q'anjob'al, and Somali.¹³² It suggests these languages as appropriate due to the number of speakers in the nation, but does not offer a standard by which to draw the line between these and other languages.¹³³ The same is true for the Port of Seattle (suggesting support in Somali, Ukrainian, Amharic, Punjabi, Japanese, Cambodian, Laotian, Farsi, Tigrinya, Oromo, and Samoan), NYCEM (suggesting support in Bengali, Polish, Yiddish, and Urdu), and Megan Schwimmer (suggesting support for International Sign Language).¹³⁴

40. The Bureau emphasizes its commitment to supporting additional languages if required by the public interest. We will monitor the deployment of the templates we adopt today and the needs of public safety agencies and the public at large and revisit this issue as appropriate.

H. Consumer Outreach and Future Updates to the Templates

41. The Commission directed the Bureau to work with the Consumer and Governmental Affairs Bureau to create a consumer guide explaining how consumers can set the default language on their cellular devices, with this guide translated into the languages we adopt today.¹³⁵ The Bureau sought comment on the approaches it should take to maximize the reach and effect of the guide, the information that should be included in the guide, and how this guide should be shared with the public, and who should be responsible for helping share the guide.¹³⁶ We agree with commenters who suggest the Bureau should work with organizations in the language community to disseminate the consumer guide.¹³⁷ We did not receive comments opining on the specific information that should be included in the consumer guide. The Bureau will work with the Consumer and Governmental Affairs Bureau to create and disseminate a consumer guide for the public, published in each of the languages for which we adopt templates today, per the delegation by the Commission.

¹³⁷ See NHMC Comments at 12-13; Lincoln-Lancaster *Ex Parte*; Georgia Tech Comments at 16.

42. The Bureau also sought comment “on the process by which the Bureau might update, supplement, or otherwise require improvements for templates.”¹³⁸ NYCEM supports “regular updates” and requests that alerting authorities be able to petition the Bureau for “additional languages, alert types, and modifications[.]”¹³⁹ The State Attorneys General recommend the Bureau undertake notice and public comment “no less frequently than every three years” to assess the most recently available American Community Survey data on spoken languages and LEP rates to add additional languages, and that this rate of periodic assessment is adequate to continuing to ensure WEA is available to the public.¹⁴⁰ We agree that alert originators, community-based organizations that represent the language communities, or other members of the public should petition the Chief of the Bureau whenever they have specific suggestions to improve or change the templates. We decline to adopt a specific frequency in which we revisit the adequacy of the languages supported, but we agree that WEA should maintain its availability. The Bureau will monitor the implementation of multilingual WEA and the needs of stakeholders to ensure WEA is an effective tool for alerting the public of the most dangerous and time-sensitive emergencies.

I. Rejecting Objections to Adopting Templates

43. As the Commission stated in the *2023 WEA Report and Order*, the use of multilingual templates improves upon available methods for sending multilingual WEA messages and will enhance the flexibility that alerting authorities have in communicating with their communities.¹⁴¹ However, some commenters continue to question the template approach already adopted by the Commission or suggest the Bureau should explore machine translation in lieu of templates.¹⁴² We do not—and cannot—revisit the viability of machine translation for creating multilingual WEA alerts.¹⁴³ Consistent with the record before the Commission, many commenters take the view that “the accuracy of a translation requires human intervention”, as “the inaccurate translation may seriously misinform WEA recipients during an emergency.”¹⁴⁴ The Attorneys General and the City of New York argue that machine and artificial intelligence forms of translation “present a serious risk of conveying inaccurate information to the public, potentially causing confusion, panic, and increased risks to public safety.”¹⁴⁵ In any event, the Bureau cannot reject templates or consider machine translation as some commenters urge because this approach falls outside the scope of its authority as delegated by the Commission, which has already rejected the use of machine translation.¹⁴⁶ We remind commenters that the Commission has stated that it “will continue to

(continued....)

examine the feasibility of machine translation technologies and its application” to multilingual WEA.¹⁴⁷

44. We disagree with commenters who argue that additional study is needed before the Bureau can adopt multilingual templates.¹⁴⁸ These commenters focus on the need to engage different stakeholders in developing multilingual WEA to find the best path forward that properly balances the interests of all interested parties.¹⁴⁹ The Bureau believes it has satisfied these concerns through the notice-and-comment process, as it has received the kind of input envisioned by these commenters across a wide variety of stakeholders.¹⁵⁰ Since the Bureau is able to address the perspectives on the record before it in today’s Report and Order, we believe further study is unnecessary before moving forward with our delegated task of implementing multilingual WEA. The record establishes that there is a critical and present public safety need for more accessible alerts, and we agree that “undue delay” in implementing multilingual templates countervails the public interest.¹⁵¹

J. Assessing the Benefits and Costs of Fillable Templates

45. The Bureau believes that adopting fillable templates will result in benefits measurable in terms of lives saved and injuries and property damage prevented. In adopting this order today, the Bureau recognizes that the Commission has already determined that the benefits of template-based multilingual alerts for WEA outweigh the costs.¹⁵² As such, the Bureau limits its review of the costs and benefits to the narrow scope of our delegation. We set aside arguments in the record that raise issues already decided by the Commission. For example, CTIA argues that the consequences of storing templates on the mobile device and negatively impact mobile device storage capacity has not been evaluated in the record, but the Commission has already evaluated the issue and determined that the templates should be stored on the device.¹⁵³ CTIA and ATIS also urge the Bureau to extend the implementation timeframe of multilingual

disadvantages of adopting a template-based system of multilingual WEAs versus a system based on machine translation.”); *cf.* Attorneys General Reply Comments at 6 (noting the Bureau’s lack of authority where the Commission has already acted).

¹⁴⁷ 2023 WEA Report and Order, 38 FCC Rcd at 10126, para. 18.

¹⁴⁸ See FEMA Ex Parte at 2-7 (recommending the Bureau conduct additional research on the content of the templates, the length of the templates, whether the non-English templates be displayed with English versions, and form-fillable templates with the academic community, alerting authorities, mobile carriers, mobile device manufacturers, and the public); CTIA Reply at 3 (“CTIA agrees with FEMA that additional research and collaboration with stakeholders . . . is necessary to develop a path forward to support multilingual alerting”); ATIS Reply at 7 (urging the Commission to reframe the proceeding as a Notice of Inquiry); Colorado Alert Originators Reply at 3.

¹⁴⁹ See, e.g., FEMA Ex Parte at 3.

¹⁵⁰ The record includes comments from all the sources from whom we are urged to consult: academics (See Art Botterell Comments; Hamilton Bean Comments; Georgia Tech Comments); alerting authorities (See City of Berkeley Comments; Lincoln-Lancaster Ex Parte; Colorado Alert Originators Comments; NYCEM Comments; Port of Seattle Comments); mobile carriers (See T-Mobile Reply); industry organizations representing manufacturers and standards development organizations (See ATIS Comments; CTIA Comments; CTA Reply); federal agencies (See FEMA Ex Parte, NWS Comments); states (See Attorneys General Reply Comments); accessibility and public safety organizations (See LAAWW Comments; APCO Ex Parte); members of the disability community (See, e.g., Oregon DEMAC Comments; Wisconsin OPIL Comments; TDI Reply; Georgia Tech Comments; TDI and Deaf Equality Ex Parte); members of the languages communities in which we adopt templates, including ASL (See NHMC Comments; 2024 WEA Multilingual Ex Parte) and members of the general public (See, e.g., Samuel Etler Comments; Ricky Harris Comments; Neil Bourgeois Comments).

¹⁵¹ Attorneys General Reply Comments at 6 (“Emergency alerts about extreme weather events, natural disasters, and other public hazards are vital to the safety and well-being of our residents, including those whose primary language is not English.”).

¹⁵² 2023 WEA Report and Order, 38 FCC Rcd at 10147-48, para. 58.

templates from 30 months after the publication of today's Order in the *Federal Register* to as much as 54 months.¹⁵⁴ As the State Attorneys General point out, the Bureau does not have the authority to change this deadline, as it has been set by the Commission in the *2023 WEA Report and Order*.¹⁵⁵ We address the issues in the record with respect to the incremental benefits and costs as they pertain to fillable templates below.

46. *Benefits of Implementing Fillable Templates.* We have already discussed the support for fillable templates in the record and the significant benefits to the public that will accrue, including increased flexibility for alert originators that would result from more effective alerts to the public.¹⁵⁶ We agree that fillable templates, which include “source, location, and time,” are “critical elements” for optimal WEA messages.¹⁵⁷ Event-specific information also “contribute[s] to personalization and, thereby, to the effectiveness of the warnings.”¹⁵⁸ LAAWW supports the Bureau’s proposal of the four fillable elements, as “[e]vent-specific information is extremely beneficial to the public.”¹⁵⁹ We agree with commenters that the fillable fields allow alert originators to provide more complete, detailed information when they alert the public, and that this information would better equip the public to understand and respond to the alert. We reiterate our belief that form-fillable templates that incorporate the name of the sender, the location, and the time of the disaster (coupled with a description of the threat and the protective action the public should take) create more effective alerts and is consistent with social science research on effective alerting.¹⁶⁰ Further, including a URL hyperlinking to further information “can further reduce milling and protective action delay.”¹⁶¹ Research indicates that more specific information about the unfolding emergency helps the public better respond and take more effective protective action.¹⁶² The Bureau finds that fillable templates provides the best way to balance technological capability with more effective alert messaging. More effective alerting results in better public response in

¹⁵⁹ LAAWW Comments at 3.

¹⁶⁰ See *WEA Multilingual Public Notice*, 39 FCC Rcd at 1178, para. 32 (proposing the benefits for fillable templates); *see, e.g.*, Art Botterell Comments at 8 (“The crucial importance of event-specific details in alert messages is well documented and widely appreciated by experienced warning practitioners.”); Hamilton Bean Comments at 2 (supporting fillable templates and discussing how fillable templates further the social science behind effective warning); NWS Comments at 2; LAAWW Comments at 3; NYCEM Comments at 1.

¹⁶¹ Hamilton Bean Comments at 2. *See also* Michele M. Wood et al., Milling and Public Warnings, 50 Environment and Behavior 4 (2017), https://www.researchgate.net/publication/317242672_Milling_and_Public_Warnings, (explaining milling as “(a) Collective behavior may occur when individuals are confused and do not know what to do; (b) when individuals do not know what to do, they look to see what others are doing; (c) when an individual engages in a behavior, others wait to observe the outcome; if no negative consequences occur, observers determine the action is acceptable, increasing the likelihood of others following suit; and (d) given that most people conform to social norms relevant to their surroundings, people tend to adhere to new emergent group norms”).

¹⁶² See Jeannette Sutton, Michele K. Olson & Nicholas A. Waugh, *The Warning Lexicon: A Multiphased Study to Identify, Design, and Develop Content for Warning Messages*, 25 Natural Hazards Review 2 (Oct. 30, 2023), <https://ascelibrary.org/doi/10.1061/NHREFO.NHENG-1900> (“Decades of research investigating effective warnings has demonstrated the importance of including these [five categories of information] to warn about imminent hazards . . . ”).

a disaster scenario and will save lives.¹⁶³ We affirm our belief, in light of the record, that considerable benefits to the safety of life and property accrue from being able to take more effective protective action as a result of fillable templates.

47. *Costs of Implementing Fillable Templates.* We conclude that the costs of implementing form fillable templates fall within the same cost estimate identified by the Commission in the *2023 WEA Report and Order*. In the *WEA Multilingual Public Notice*, we tentatively concluded that the costs to adopt form-fillable templates would not exceed the \$42.4 million cost ceiling the Commission found applicable to implementing static templates because both fillable and static templates would require Participating CMS Providers to undertake a similar process of determining what changes would be required to storage, standards, processes, and devices.¹⁶⁴ CTIA argues that the costs to support templates are not minimally burdensome and that the *WEA Multilingual Public Notice* fails to consider that there will be greater costs associated with implementation work not considered by the Bureau.¹⁶⁵ As we discuss above, we believe the analysis in the *WEA Multilingual Public Notice* is inclusive of the issues that CTIA raises with respect to the time required to do the implementation work.¹⁶⁶ Because the implementation timeline does not change, we believe the cost ceiling we proposed is still applicable. No commenter challenges our tentative conclusion that the costs will not exceed the \$42.4 million ceiling. Therefore, we adopt our tentative conclusion that the costs to industry to implement fillable temples will not exceed \$42.4 million. As thoroughly analyzed by the Commission in the *2023 WEA Report and Order*, this cost ceiling accounts for the full scope of what Participating CMS Providers need to do to implement multilingual templates. We today conclude in the absence of contrary comments that the same analysis applies to implementing fillable templates. Because the Commission determined this cost was outweighed by the benefits of static templates, and we conclude that there are additional benefits to the public by adopting fillable templates, we conclude that the benefits of fillable templates are outweighed by the marginal cost of implementing them.

IV. PROCEDURAL MATTERS

48. *Regulatory Flexibility Act.* The Regulatory Flexibility Act of 1980, as amended (RFA)¹⁶⁷ requires that an agency prepare a regulatory flexibility analysis for notice and comment rulemakings, unless the agency certifies that “the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.”¹⁶⁸ Accordingly, the Bureau has prepared a Supplemental Final Regulatory Flexibility Analysis (Supplemental FRFA) concerning the potential impact of the adopted rules in this Report and Order, on small entities. The Supplemental FRFA is set forth in Appendix B.

49. *Congressional Review Act.* The Bureau has determined that these rules are non-major under the Congressional Review Act, 5 U.S.C. § 804(2). The Bureau will send a copy of this Report and Order to Congress and the Government Accountability Office, pursuant to the Congressional Review Act.¹⁶⁹

50. *Paperwork Reduction Act Analysis.* This Report and Order contains new or modified information collection requirements. All such new or modified information collection requirements will

¹⁶³ See Michele M. Wood, Dennis Miletic, Hamilton Bean, Brooke Liu, Jeannette Sutton, and Stephanie Madden, Milling and Public Warnings, 50 Environment and Behavior (2017), https://www.researchgate.net/publication/317242672_Milling_and_Public_Warnings.

¹⁶⁷ 5 U.S.C. §§ 601–612. The RFA has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Pub. L. No. 104-121, Title II, 110 Stat. 857 (1996).

¹⁶⁸ 5 U.S.C. § 605(b).

¹⁶⁹ See 5 U.S.C. § 801(a)(1)(A).

be submitted to the Office of Management and Budget (OMB) for review under section 3507(d) of the Paperwork Reduction Act of 1995 (PRA).¹⁷⁰ OMB, the general public, and other Federal agencies are invited to comment on any new or modified information collection requirements contained in this proceeding. In addition, we note that, pursuant to the Small Business Paperwork Relief Act of 2002,¹⁷¹ the Commission previously sought, but did not receive, specific comments on how the Commission might further reduce the information collection burden for small business concerns with fewer than 25 employees. In Appendix B, we have assessed the effects of the required collection of information on these small entities.

51. *Contact Information.* For further information, please contact Joshua Gehret, Cybersecurity and Communications Reliability Division, Public Safety and Homeland Security Bureau at (202) 418-7816 or by email at Joshua.Gehret@fcc.gov, or James Zigouris, Cybersecurity and Communications Reliability Division, Public Safety and Homeland Security Bureau, (202) 418-0697 or by email to James.Zigouris@fcc.gov.

V. ORDERING CLAUSES

52. ACCORDINGLY IT IS ORDERED, pursuant to the authority contained in Sections 1, 2, 4(i), 4(n), 5(c), 301, 303(b), 303(e), 303(g), 303(j), 303(r), 307, 309, 316, 403, and 706 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 152, 154(i), 154(n), 155(c), 301, 303(b), 303(e), 303(g), 303(j), 303(r), 307, 309, 403, and 606, as well as by sections 602(a), (b), (c), (f), 603, 604 and 606 of the Warning Alert and Response Network (WARN) Act, 47 U.S.C. §§ 1201(a), (b), (c), (f), 1203, 1204 and 1206, the Wireless Emergency Alerts, Amendments to Part 11 of the Commission's Rules Regarding the Emergency Alert System, PS Docket Nos. 15-94 and 15-91, Third Report and Order, FCC 23-88 (2023), and 47 CFR §§ 0.5(c), 0.191, 0.201, 0.204, and 0.392 that this Report and Order IS hereby ADOPTED.

53. IT IS FURTHER ORDERED that the amendments of Part 10 of the Commission's Rules as set forth in Appendix A are ADOPTED. As provided in the *2023 WEA Report and Order*, the adopted rule is effective 30 months from the date of the rule's publication in the *Federal Register*.

54. IT IS FURTHER ORDERED that the Commission's Office of the Secretary, SHALL SEND a copy of this Report and Order, including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

55. IT IS FURTHER ORDERED that the Bureau SHALL SEND a copy of this Order in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. § 801(a)(1)(A).

FEDERAL COMMUNICATIONS COMMISSION

Debra Jordan
Chief
Public Safety and Homeland Security Bureau

¹⁷⁰ 44 U.S.C. § 3507(d).

¹⁷¹ Pub. L. No. 107-198, 116 Stat. 729 (2002) (codified at 44 U.S.C. § 3506(c)(4)).

APPENDIX A**Final Rules**

For the reasons discussed in the document above, the Federal Communications Commission amends 47 CFR part 10 as follows:

PART 10 – WIRELESS EMERGENCY ALERTS

1. The authority citation for part 10 is revised to read as follows:

Authority: 47 U.S.C. 151, 152, 154(i), 154(n), 201, 301, 303(b), 303(e), 303(g), 303(j), 303(r), 307, 309, 316, 403, 544(g), 606, 1201, 1202, 1203, 1204, and 1206.

2. Amend § 10.480 by adding paragraphs (c), (d), (e), and (f) to read as follows:

§ 10.480 Language support.

* * * * *

(c) Participating CMS Providers shall support pre-scripted alert templates for the following events: tornado emergency, tornado warning, flash flood emergency, flash flood warning, severe thunderstorm, snow squall, dust storm, hurricane, storm surge, extreme wind, test alert, fire, tsunami, earthquake, boil water, avalanche, hazardous materials, and 911 outage.

(d) Participating CMS Providers shall support the pre-scripted alert templates listed in paragraph (c) of this section for English, Arabic, Chinese (simplified and traditional), French, German, Haitian Creole, Hindi, Italian, Korean, Portuguese, Russian, Spanish, Tagalog, and Vietnamese. The language of the templates that Participating CMS Providers must support is provided at:

<https://www.fcc.gov/sites/default/files/FillableAlertTemplates-WEA-MultilingualOrder.pdf>.

(e) Participating CMS Providers shall support the inclusion of four fillable elements that customize the pre-scripted alert templates for the languages listed in paragraph (d) of this section. Alert Messages that use the pre-scripted alert templates shall display, as specified by the originator:

- (1) in the [SENDING AGENCY] field, the name of the agency originating the alert;
- (2) in the [LOCATION] field, the name of the geographic area pertaining to the alert message;
- (3) in the [TIME] field, the time when the emergency conditions described in the alert are expected to end;
- (4) in the [URL] field, a Uniform Resource Locator (URL), if included by the alert originator.

(f) Participating CMS Providers shall support non-fillable, pre-scripted alert templates for American Sign Language (ASL) for each of the events listed in paragraph (c) of this section. The pre-scripted video templates that Participating CMS Providers must support are provided at:

<https://www.fcc.gov/WirelessEmergencyAlert-Templates-ASL>.

3. Amend § 10.500 by adding paragraph (e)(3) as follows:

§ 10.500 General requirements.

* * * * *

(e) * * *

- (3) Displaying the corresponding pre-scripted Alert Messages in English following the display of each Alert Message that uses a pre-scripted alert template in a non-English language.

* * * * *

APPENDIX B**Supplemental Final Regulatory Flexibility Analysis**

1. As required by the Regulatory Flexibility Act of 1980, as amended (RFA),¹ the Public Safety and Homeland Security Bureau (Bureau) of the Federal Communications Commission (Commission) incorporated a Supplemental Initial Regulatory Flexibility Analysis (IRFA) into the *Public Safety and Homeland Security Bureau Seeks Comment on Implementation of Multilingual Wireless Emergency Alerts, Public Notice (WEA Multilingual Public Notice)* released in February 2024.² The Commission prepared Regulatory Flexibility Analyses in connection the 2023 *WEA FNRP* released in April 2023,³ and the 2023 *Report and Order* released in October 2023.⁴ The Commission sought written public comment on the proposals in the 2023 *WEA FNRP*, including comment on the IFRA. Additionally, the Bureau sought written public comment on the proposals in the *WEA Multilingual Public Notice*, including comment on the Supplemental IFRA. No comments were filed addressing the Supplemental IRFA. This Supplemental Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.⁵

A. Need for, and Objectives of, the Final Rules

2. In today's Report and Order, the Bureau adopts rules for multilingual templates that will increase the availability of Wireless Emergency Alerts (WEA) alerts for persons with limited English proficiency that understand one or more of the 13 most commonly spoken languages in the United States, as well as English and American Sign Language (ASL).⁶ These rules effectuate the Commission's October 2023 mandate for the Bureau to develop the specific implementation parameters for template-based multilingual alerting.⁷ Specifically, the Report and Order builds upon the requirement that Participating CMS Providers support the display of a pre-scripted alert pre-installed and stored in the mobile device that corresponds to the default language of the mobile device. The Report and Order requires Participating CMS Providers to support multilingual templates on mobile devices for the following eighteen alerts: tornado emergency, tornado warning, flash flood emergency, flash flood warning, severe thunderstorm, snow squall, dust storm, hurricane, storm surge, extreme wind, test alert, fire, tsunami, earthquake, boil water, avalanche, hazardous materials, and 911 outage. Participating CMS Providers are required to support pre-scripted alert templates for English, Arabic, Simplified Chinese, Traditional Chinese, French, German, Haitian Creole, Hindi, Italian, Korean, Portuguese, Russian, Spanish, Tagalog, and Vietnamese. Participating CMS Providers are also required to support the inclusion of four fillable elements that allow for the customization of the pre-scripted templates. Further, Participating CMS Providers must cause the fillable English version of the pre-scripted alert message to accompany the alert messages that use the pre-scripted templates for written forms of the 13 languages.

¹ 5 U.S.C. § 603. The RFA, 5 U.S.C. §§ 601-612, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996, (SBREFA) Pub. L. No. 104-121, Title II, 110 Stat. 857 (1996).

² See *Public Safety and Homeland Security Bureau Seeks Comment on Implementation of Multilingual Wireless Emergency Alerts*, PS Docket Nos. 15-94 and 15-91, Public Notice, 39 FCC Rcd 1165, 1185-89, Appx. B (2024) (*WEA Multilingual Public Notice*).

³ See *Wireless Emergency Alerts, Amendments to Part 11 of the Commissions' Rules Regarding the Emergency Alert System*, PS Docket Nos. 15-94 and 15-91, Further Notice of Proposed Rulemaking, 38 FCC Rcd 3739, 3791-3819, Appx. B, paras. 1-79 (2023) (2023 *WEA FNPRM*).

⁴ See *Wireless Emergency Alerts, Amendments to Part 11 of the Commission's Rules Regarding the Emergency Alert System*, PS Docket Nos. 15-94 and 15-91, Third Report and Order, 38 FCC Rcd 10116, 10158-10184, Appx. B, paras. 1-67 (2023) (2023 *WEA Report and Order*).

⁵ 5 U.S.C. § 604.

⁶ In addition to English, the 13 most commonly spoken languages in the United States are Arabic, Chinese, French, German, Haitian Creole, Hindi, Italian, Korean, Portuguese, Russian, Spanish, Tagalog, and Vietnamese.

⁷ 2023 *WEA Report and Order*, 38 FCC Rcd at 10128, para. 21.

The alert message using the pre-scripted template in the non-English language must be displayed first, and must be followed by the alert message using the English pre-scripted template. By offering alert originators the option to use these templates, users of various languages in their communities can get increased accessibility to potentially life-saving emergency information from WEA.

3. For ASL, because fillable template are not technically feasible at this time, the Bureau instead requires Participating CMS Providers to support non-fillable ASL templates. We believe this approach balances the needs of the deaf and hard of hearing community to receive WEAs in ASL, the needs to alert originators to include information tailored to the emergency through fillable templates, and the technical capabilities of WEA.

4. In adopting fillable templates, there are significant benefits to the public that will accrue, including increased flexibility for alert originators that will allow more effective alerts to be sent to the public. The record is clear that fillable templates, which include “source, location, and time,” fields, are “critical elements” for optimal WEA messages.⁸ These fillable fields benefit the public by allowing alert originators to provide more complete, detailed information when they alert the public, and that this information better equips the public to understand and respond to the alert. Thus, the Bureau finds that requiring fillable templates provide the best way to balance the current technical capabilities of WEA and more effective alert messaging. Further, the record specifically demonstrates that considerable benefits to the safety of life and property will accrue from the use of fillable templates with WEA messages by allowing the public to take more effective protective action in emergency situations.

B. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

5. There were no comments filed that specifically addressed the proposed rules and policies presented in the Supplemental IRFA.

C. Response to Comments by the Chief Counsel for Advocacy of the Small Business Administration

6. Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA), and to provide a detailed statement of any change made to the proposed rules as a result of those comments.⁹ The Chief Counsel did not file any comments in response to the proposed rules in this proceeding.

D. Description and Estimate of the Number of Small Entities to Which the Rules Will Apply

7. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the rules adopted herein.¹⁰ The RFA generally defines the term “small entity” as having the same meaning as the terms “small business,” “small organization,” and “small governmental jurisdiction.”¹¹ In addition, the term “small business” has the same meaning as the term “small business concern” under the Small Business Act.¹² A “small business concern” is one which: (1) is independently owned and operated; (2) is not dominant in its field of

⁸ Hamilton Bean Comments at 2.

⁹ 5 U.S.C. § 604(a)(3).

¹⁰ 5 U.S.C. § 604(a)(4).

¹¹ 5 U.S.C. § 601(6).

¹² 5 U.S.C. § 601(3) (incorporating by reference the definition of “small-business concern” in the Small Business Act, 15 U.S.C. § 632). Pursuant to 5 U.S.C. § 601(3), the statutory definition of a small business applies “unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the Federal Register.”

operation; and (3) satisfies any additional criteria established by the SBA.¹³

8. As noted above, Regulatory Flexibility Analyses were incorporated into the *WEA Multilingual Public Notice* from the 2023 *WEA FNPRM* and the 2023 *Report and Order*. In those analyses, the Commission described in detail the small entities that might be significantly affected. Accordingly, in this Supplemental FRFA, we hereby incorporate by reference the descriptions and estimates of the number of small entities from the previous Regulatory Flexibility Analyses in the 2023 *WEA FNPRM* and the 2023 *WEA Report and Order*.¹⁴

E. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

9. Today's Report and Order will not impose additional reporting and recordkeeping on small entities who are Participating CMS Providers voluntarily participating in WEA. The Bureau notes that the obligations regarding these templates were already detailed and adopted by the Commission in the 2023 *WEA Report and Order*. The Report and Order serves only to establish the parameters for how the reporting and recordkeeping obligations related to multilingual alert templates adopted in the 2023 *WEA Report and Order* must be implemented. As described above in section A, the Report and Order adopts a list of templates that must be stored on WEA-capable mobile devices representing the most commonly utilized and the most time sensitive alert types which are required to be supported in English and the written forms of 13 additional languages. The templates must support customizable information about the sending agency, time, location, and an optional URL, and Participating CMS Providers must support the ability for the fillable English version of the pre-scripted alert message to accompany the alert messages that use the pre-scripted templates for the 13 languages. The Report and Order requires that the ASL templates be non-fillable and that alert messages that use these templates be accompanied by a corresponding alert message using the fillable English alert.

10. In the 2023 *WEA Report and Order* the Commission estimated \$42.4 million as the maximum cost ceiling for implementation of the templates in English, the 13 most commonly spoken languages in the U.S., and ASL.¹⁵ This estimate, which takes into consideration the complete scope of what is required for small and other Participating CMS Providers to implement multilingual templates, included the costs for fillable templates which we address in the Report and Order. Regarding compliance costs for small entities, we note that the Bureau has provided the required translated templates, so small Participating CMS Providers will not be responsible for the costs of translating templates. For these reasons, the Bureau expects the implementation details finalized in the Report and Order will impose minimal burdens on small entities, and we do not expect that small entities will have to hire professionals to implement the requirements beyond what may be required to implement the 2023 *WEA Report and Order*. Small and other Participating CMS Providers will have 30 months from publication of the rules in the *Federal Register* to comply with the requirements adopted in today's Report and Order. The Commission established this compliance timeframe in the 2023 *WEA Report and Order* which was not subsequently requested to be reconsidered, and the Bureau does not have authority to change this timeframe.¹⁶

¹³ 15 U.S.C. § 632.

¹⁴ See 2023 *WEA FNPRM*, 38 FCC Rcd at 3792-3812, Appx. B, paras. 6-55; 2023 *WEA Report and Order*, 38 FCC Rcd at 10160-80, Appx. B, paras. 9-58.

¹⁵ 2023 *WEA Report and Order*, 38 FCC Rcd at 10150-52, paras. 64-65.

¹⁶ *Id.* at 10130-32, paras. 25-27. The Commission did not receive any petitions for reconsideration of the 30-month compliance timeframe after 2023 *WEA Report and Order* was adopted.

F. Steps Taken to Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

11. The RFA requires an agency to provide, “a description of the steps the agency has taken to minimize the significant economic impact on small entities . . . including a statement of the factual, policy, and legal reasons for selecting the alternative adopted in the final rule and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.”¹⁷

12. The Bureau is mindful that in meeting its duty to develop the nation’s emergency preparedness by making WEA more accessible, small entities may incur costs. As we note above in section E, the costs for template development and implementation addressed in the Report and Order were included in the costs for small and other Participating CMS Providers associated with implementing the *2023 WEA Report and Order*. We believe that because the Commission has already taken on the cost of translating templates, including creating ASL video templates, we have taken a significant step to help reduce the burden on small entities. In considering whether the templates should be static or fillable, the Bureau concluded that fillable templates would provide additional public safety benefits which outweighed the costs of requiring small and other Participating CMS Providers to take on burdens that are similar to the implementation of static templates. However, the Bureau further reduced burdens on small and other Participating CMS Providers by requiring support for non-fillable ASL templates because the Bureau finds that fillable ASL templates are not technically feasible at this time.

13. We also considered and declined to require the fillable elements in the multilingual versions of the templates to be translated into that template’s language, and to require a revision to the 911 template adding support of a telephone number as a fillable part of the template, which would have increased burdens on small and other Participating CMS Providers. Additionally, the Bureau reduced burdens on small providers by declining to adopt a requirement to implement generic templates for evacuation and shelter-in-place templates, as originally proposed in the *WEA Multilingual Public Notice*. We agreed with commenters that generic templates for these types of situations would not be effective, and posed the risk of making an emergency situation worse since recipients of such generic alerts may be less likely to take action in response to the alert. Lastly, although some commenters advocated for a longer implementation time period of 36-54 months which would have benefitted small Participating CMS Providers, we mention in the previous section that the Bureau was not vested with authority to change the Commission adopted 30-month deadline. Moreover, commenters did not adequately explain or provide evidence to substantiate why the form-fillable multilingual template requirements adopted in today’s Report and Order could not be implemented within 30 months from publication of the Report and Order in the *Federal Register*.

G. Report to Congress

14. The Commission will send a copy of the Report and Order, including this Supplemental FRFA, in a report to be sent to Congress pursuant to the Congressional Review Act.¹⁸ In addition, the Commission will send a copy of the Report and Order, including this Supplemental FRFA, to the Chief Counsel for Advocacy of the SBA. A copy of the Report and Order and Supplemental FRFA (or summaries thereof) will also be published in the *Federal Register*.¹⁹

APPENDIX C
English Templates

Template	Revised Templates
Tornado Emergency	[SENDING AGENCY]: A TORNADO EMERGENCY is in effect for [LOCATION] until [TIME]. Tornado spotted in this area. This is a life-threatening situation. Take shelter now in a basement or an interior room on the lowest floor of a sturdy building. If you are outdoors, in a mobile home, or in a vehicle, move to the closest sturdy shelter and protect yourself from flying objects. Check media. [URL]
Tornado Warning	[SENDING AGENCY]: A TORNADO WARNING is in effect for [LOCATION] until [TIME]. Take shelter now in a basement or an interior room on the lowest floor of a sturdy building. If you are outdoors, in a mobile home, or in a vehicle, move to the closest sturdy shelter and protect yourself from flying objects. Check media. [URL]
Flash Flood Emergency	[SENDING AGENCY]: A FLASH FLOOD EMERGENCY is in effect for [LOCATION] until [TIME]. This is an extremely dangerous and life-threatening situation. Do not attempt to travel unless you are fleeing an area that may flood or are under an evacuation order. [URL]
Flash Flood Warning	[SENDING AGENCY]: A FLASH FLOOD WARNING is in effect for [LOCATION] until [TIME]. This is a dangerous and life-threatening situation. Do not attempt to travel unless you are fleeing an area that may flood or are under an evacuation order. [URL]
Severe Thunderstorm Warning	[SENDING AGENCY]: A SEVERE THUNDERSTORM WARNING is in effect for [LOCATION] until [TIME] for DESTRUCTIVE 80 mile per hour winds. Take shelter inside a sturdy building, away from windows. Flying objects may be deadly to those outside a sturdy shelter. [URL]
Snow Squall Warning	[SENDING AGENCY]: A SNOW SQUALL WARNING is in effect for [LOCATION] until [TIME]. Slow down or delay travel! Be ready for a sudden drop to near zero visibility and icy roads in heavy snow. [URL]
Dust Storm Warning	[SENDING AGENCY]: A DUST STORM WARNING is in effect for [LOCATION] until [TIME]. Be ready for sudden drop to zero visibility. Pull Aside, Stay Alive! When visibility drops, pull far off the road and put your vehicle in park. Turn the lights off and keep your foot off the brake. Infants, the elderly, and those with trouble breathing urged to take precautions. [URL]
Hurricane Warning	[SENDING AGENCY]: A HURRICANE WARNING is in effect for [LOCATION] for dangerous and damaging winds until [TIME]. This warning is issued up to 36 hours before hazardous conditions begin. Take steps to protect life and property. Have food, water, cash, fuel, and medications for 3+ days. FOLLOW INSTRUCTIONS FROM LOCAL OFFICIALS. [URL]
Storm Surge Warning	[SENDING AGENCY]: A STORM SURGE WARNING is in effect for [LOCATION] for the danger of life-threatening flooding until [TIME]. This warning is issued up to 36 hours before hazardous conditions begin. Take steps to protect life and property. Follow evacuation orders if given for this area to avoid drowning or being cut off from emergency services. [URL]

Extreme Wind Warning	[SENDING AGENCY]: An EXTREME WIND WARNING is in effect for [LOCATION] for the immediate danger of life-threatening winds until [TIME]. Take cover NOW in an interior room of a sturdy building, away from windows. Protect your head from flying objects. Do NOT go outside if the wind calms! Winds will quickly become dangerous again. [URL]
Test Alert	THIS IS A TEST of the National Wireless Emergency Alert System sent by [SENDING AGENCY]. The purpose is to maintain and improve alert and warning capabilities at the federal, state, local, Tribal and territorial levels and to evaluate the nation's public alert and warning capabilities. No action is required by the public. [URL]
Tsunami Warning	[SENDING AGENCY]: A TSUNAMI WARNING is in effect for [LOCATION] until [TIME]. A series of powerful waves and strong currents may affect coasts near you. You are in danger. Get away from coastal waters. Move to high ground or inland now. Keep away from the coast until local officials say it is safe to return. [URL]
Earthquake Warning	EARTHQUAKE DETECTED! Drop, Cover, Hold On. Protect Yourself. [SENDING AGENCY] [URL]
Boil Water Advisory	[SENDING AGENCY]: A BOIL WATER ALERT has been issued for [LOCATION] and is in effect until [TIME]. Water in your community can make you sick. Use bottled water if available. Do not drink, cook with, brush your teeth with, or clean your home with tap water or filtered water until you boil it. Bring water to a full rolling boil for THREE MINUTES. Let water cool before use. Do not use ice made with water that has not been boiled. If you use formula to feed your child, use ready-to-use formula. Make sure pets do not drink water that has not been boiled. [URL]
911 Outage Alert	[SENDING AGENCY]: A 9-1-1 OUTAGE ALERT is in effect for [LOCATION]. Please contact police, fire, medical, or other emergency services directly at their local phone numbers in case of emergency. If you dial 9-1-1, you may not get help. [URL]
Avalanche Warning	[SENDING AGENCY]: An AVALANCHE WARNING is in effect in [LOCATION] until [TIME]. Unstable, fast-moving snow can happen quickly, causing injury or death and can block roads and damage property in affected areas. LEAVE areas near [LOCATION]. DO NOT return to area after evacuation until directed by local officials. Travel in the area is not recommended. Avalanches may run long distances. [URL]
Fire Warning	[SENDING AGENCY]: A FIRE WARNING in [LOCATION] is in effect until [TIME]. Evacuate your family and pets now, do not delay. Visibility in area will be reduced and roads can become blocked. If you do not leave now, you could be trapped, injured, or killed. LEAVE areas near [LOCATION]. Expect reduced visibility, heavy smoke, and difficulty breathing. Be careful when driving. Watch for public safety personnel operating in the area and follow their instructions. [URL]
Hazardous Materials Warning	[SENDING AGENCY]: HAZARDOUS MATERIALS were released at [TIME] in [LOCATION]. Exposure may cause difficulty breathing, loss of coordination, burning sensation in eyes, nose, throat, or lungs, nausea, and possibly death. LEAVE areas near [LOCATION]. IF DRIVING to evacuate area, keep car windows and vents closed. DO NOT return to area after evacuation unless directed by local officials. [URL]

Évitez de vous déplacer à moins que vous ne quittiez une zone inondable ou que vous ne fassiez l'objet d'un ordre d'évacuation. [URL]
Severe Thunderstorm Warning	[SENDING AGENCY] : un AVIS D'ORAGE VIOLENT est en vigueur pour [LOCATION] jusqu'à [TIME] avec des vents DESTRUCTEURS de 130 km/heure. Mettez-vous à l'abri à l'intérieur d'un bâtiment robuste, loin des fenêtres. Les objets volants peuvent être mortels pour les personnes se trouvant à l'extérieur d'un abri robuste. [URL]
Snow Squall Warning	[SENDING AGENCY] : un AVIS DE BOURRASQUE DE NEIGE est en vigueur pour [LOCATION] jusqu'à [TIME]. Ralentissez ou reportez vos déplacements ! Préparez-vous à une chute soudaine de la visibilité, qui pourrait devenir presque nulle, et à des routes verglacées en cas de neige abondante. [URL]
Dust Storm Warning	[SENDING AGENCY] : un AVIS DE TEMPÊTE DE POUSSIÈRE est en vigueur pour [LOCATION] jusqu'à [TIME]. Préparez-vous à une baisse soudaine de la visibilité, qui pourrait devenir nulle. Arrêtez-vous, restez en vie ! Lorsque la visibilité diminue, quittez la route et mettez votre véhicule en position de stationnement. Éteignez les phares et n'appuyez pas sur la pédale de frein. Les nourrissons, les personnes âgées et les personnes souffrant de problèmes respiratoires sont invités à prendre des précautions. [URL]

Hurricane Warning	[SENDING AGENCY] : un AVIS D'OURAGAN est en vigueur pour [LOCATION] jusqu'à [TIME] en raison de vents dangereux et destructeurs. Cet avis est émis au moins 36 heures avant le début des conditions dangereuses. Prenez des mesures pour protéger votre vie et vos biens. Prévoyez suffisamment de nourriture, d'eau, d'argent, de carburant et de médicaments pour 3 jours ou plus. SUIVEZ LES INSTRUCTIONS DES AUTORITÉS LOCALES. [URL]
Storm Surge Warning	[SENDING AGENCY] : un AVIS D'ONDE DE TEMPÊTE est en vigueur pour [LOCATION] en raison du risque d'inondations potentiellement mortelles jusqu'à [TIME]. Cet avis est émis au moins 36 heures avant le début des conditions dangereuses. Prenez des mesures pour protéger votre vie et vos biens. Suivez les ordres d'évacuation donnés pour cette zone afin d'éviter de vous noyer ou d'être coupé des services d'urgence. [URL]
Extreme Wind Warning	[SENDING AGENCY] : un AVIS DE VENT EXTRÊME est en vigueur pour [LOCATION] en raison du danger immédiat de vents potentiellement mortels jusqu'à [TIME]. Mettez-vous à l'abri dès MAINTENANT dans une pièce intérieure d'un bâtiment robuste, loin des fenêtres. Protégez votre tête des objets volants. Ne sortez PAS à l'extérieur si le vent se calme ! Les vents sont susceptibles de redevenir dangereux rapidement. [URL]
Test Alert	CECI EST UN TEST du Système national d'alertes d'urgence sans fil envoyé par [SENDING AGENCY]. L'objectif est de maintenir et d'améliorer les capacités d'alerte et d'avertissement aux niveaux fédéral, étatique, local, tribal et territorial et d'évaluer les capacités d'alerte et d'avertissement du pays. Aucune action n'est requise de la part du public. [URL]
Tsunami Warning	[SENDING AGENCY] : un AVIS DE TSUNAMI est en vigueur pour [LOCATION] jusqu'à [TIME]. Une série de vagues puissantes et de forts courants peuvent affecter les côtes situées près de chez vous. Vous êtes en danger. Éloignez-vous des eaux côtières. Réfugiez-vous sur les hauteurs ou à l'intérieur des terres dès maintenant. Restez éloigné des côtes jusqu'à ce que les autorités locales vous permettent de rentrer chez vos en toute sécurité. [URL]
Earthquake Warning	TREMLEMENT DE TERRE DÉTECTÉ ! Baissez-vous, couvrez-vous et tenez-vous bien. Protégez-vous. [SENDING AGENCY] [URL]
Boil Water Advisory	[SENDING AGENCY] : un AVIS DE FAIRE BOUILLIR L'EAU a été émis pour [LOCATION] et est en vigueur jusqu'à [TIME]. L'eau de votre communauté peut vous rendre malade. Utilisez de l'eau en bouteille si possible. Vous ne devez pas boire, cuisiner, vous brosser les dents et nettoyer votre maison avec de l'eau du robinet ou de l'eau filtrée sans l'avoir faite bouillir. Portez l'eau à ébullition pendant TROIS MINUTES. Laissez l'eau refroidir avant de l'utiliser. N'utilisez pas de glace produite avec de l'eau non bouillie. Si vous utilisez du lait maternisé pour nourrir votre enfant, utilisez du lait maternisé prêt à l'emploi. Veillez à ce que les animaux domestiques ne boivent pas d'eau non bouillie au préalable. [URL]

911 Outage Alert	[SENDING AGENCY] : un AVIS D'INTERRUPTION DU 9-1-1 est en vigueur pour [LOCATION]. En cas d'urgence, veuillez contacter la police, les pompiers, les services médicaux ou tout autre service d'urgence directement en appelant leur numéro de téléphone local. Si vous composez le 9-1-1, vous risquez de ne pas obtenir d'aide. [URL]
Avalanche Warning	[SENDING AGENCY] : un AVIS D'AVALANCHE pour [LOCATION] est en vigueur jusqu'à [TIME]. Une neige instable, qui atteint des vitesses élevées en mouvement, peut se produire rapidement et entraîner des blessures ou la mort, bloquer les routes et causer des dégâts matériels dans les zones touchées. QUITTEZ les zones situées à côté de [LOCATION]. Ne retournez pas dans les zones impactées par l'ordre d'évacuation à moins d'avoir reçu la permission des autorités locales. Les déplacements dans ces zones sont déconseillés. Les avalanches peuvent couvrir de longues distances. [URL]
Fire Warning	[SENDING AGENCY] : un AVIS D'INCENDIE pour [LOCATION] est en vigueur jusqu'à [TIME]. Évacuez votre famille et vos animaux de compagnie dès maintenant, sans plus attendre. La visibilité dans la région va diminuer et les routes risquent d'être bloquées. Si vous ne partez pas maintenant, vous risquez d'être bloqué, blessé ou tué. Quittez les zones situées près de [LOCATION]. Attendez-vous à une visibilité réduite, à une forte fumée et à des difficultés respiratoires. Soyez prudent en conduisant. Faites attention au personnel des services de sécurité publique opérant dans la zone et suivez leurs instructions. [URL]
Hazardous Materials Warning	[SENDING AGENCY] : un déversement de MATIÈRES DANGEREUSES s'est produit à [TIME] à [LOCATION]. Le contact avec ces matières peut entraîner des difficultés respiratoires, une perte de coordination, une sensation de brûlure dans les yeux, le nez, la gorge ou les poumons, des nausées et, éventuellement, la mort. QUITTEZ la zone située près de [LOCATION]. SI VOUS CONDUISEZ pour évacuer la zone, gardez les fenêtres et les bouches d'aération de la voiture fermées. NE RETOURNEZ PAS dans la zone après évacuation à moins d'avoir reçu la permission des autorités locales. [URL]

Tornado Emergency	[SENDING AGENCY]: Um AVISO DE EMERGÊNCIA DE TORNADO está em vigor para [LOCATION] até [TIME]. Um tornado foi avistado nesta região. Esta é uma situação de risco de vida. Procure imediatamente abrigo em um porão ou em uma sala interna no andar mais baixo de um edifício sólido e seguro. Se você estiver ao ar livre, em uma casa móvel ou em um veículo, dirija-se ao abrigo seguro mais próximo e proteja-se de objetos voadores. Acompanhe a cobertura da mídia local. [URL]
Tornado Warning	[SENDING AGENCY]: Um ALERTA DE TORNADO está em vigor para [LOCATION] até [TIME]. Abrigue-se agora em um porão ou em uma sala interna no andar mais baixo de um edifício seguro. Se você estiver ao ar livre, em uma casa móvel ou em um veículo, dirija-se ao abrigo sólido e seguro mais próximo e proteja-se de objetos voadores. Acompanhe a cobertura da mídia local. [URL]
Flash Flood Emergency	[SENDING AGENCY]: Um AVISO DE EMERGÊNCIA DE INUNDAÇÕES REPENTINAS está em vigor para [LOCATION] até [TIME]. Esta é uma situação extremamente perigosa e de risco de vida. Não tente viajar, a menos que esteja deixando uma área que pode inundar ou está sob uma ordem de evacuação. [URL]
Flash Flood Warning	[SENDING AGENCY]: Um ALERTA DE EMERGÊNCIA DE INUNDAÇÕES REPENTINAS está em vigor para [LOCATION] até [TIME]. Esta é uma situação extremamente perigosa e de risco de vida. Não tente viajar, a menos que esteja deixando uma área que pode inundar ou está sob uma ordem de evacuação. [URL]
Severe Thunderstorm Warning	[SENDING AGENCY]: Um AVISO DE TEMPESTADE SEVERA está em vigor para [LOCATION] até [TIME] para ventos DESTRUTIVOS de 80 milhas por hora. Procure abrigo dentro de um abrigo seguro, longe das janelas. Os objetos voadores podem ser fatais para aqueles sem abrigo. [URL]
Snow Squall Warning	[SENDING AGENCY]: Um AVISO DE TEMPESTADE DE NEVE está em vigor para [LOCATION] até [TIME]. Diminua a velocidade ou adie a sua viagem! Prepare-se para uma queda repentina de visibilidade e gelo nas estradas em caso de neve intensa. [URL]
Dust Storm Warning	[SENDING AGENCY]: Um AVISO DE TEMPESTADE DE POEIRA está em vigor para [LOCATION] até [TIME]. Esteja preparado para uma queda repentina na visibilidade. Pare no acostamento, fique vivo! Quando a visibilidade diminuir, pare seu veículo fora da estrada. Apague as luzes e tire o pé do freio. Crianças, idosos e pessoas com dificuldade para respirar devem tomar precauções. [URL]
Hurricane Warning	[SENDING AGENCY]: Um AVISO DE FURACÃO está em vigor para [LOCATION] devido a ventos perigosos até [TIME]. Este aviso é emitido até 36 horas antes do início das condições perigosas. Tome medidas para proteger a vida e a propriedade. Tenha comida, água, dinheiro, combustível e medicamentos por 3+ dias. SIGA AS INSTRUÇÕES DAS AUTORIDADES LOCAIS. [URL]

Storm Surge Warning	[SENDING AGENCY]: Um ALERTA DE MARÉ DE TEMPESTADE (RESSACA) está em vigor para [LOCATION] para o perigo de inundações potencialmente fatais até [TIME]. Este alerta é emitido até 36 horas antes do início das condições perigosas. Tome medidas para proteger a vida e a propriedade. Siga as ordens de evacuação se forem emitidas para esta região para evitar afogamentos ou ficar sem acesso aos serviços de emergência. [URL]
Extreme Wind Warning	[SENDING AGENCY]: Um AVISO DE VENTOS EXTREMOS está em vigor para [LOCATION] pelo perigo imediato de ventos potencialmente fatais até [TIME]. Proteja-se AGORA em uma sala no interior de um prédio seguro, longe das janelas. Proteja sua cabeça de objetos voadores. NÃO saia do abrigo se o vento acalmar! Os ventos rapidamente se tornarão perigosos novamente. [URL]
Test Alert	ESTE É UM TESTE do Sistema Nacional de Alertas de Emergência Sem Fio enviado por/pela [SENDING AGENCY]. O objetivo é manter e melhorar as capacidades de aviso e alerta a nível federal, estadual, local, tribal e territorial e avaliar as capacidades públicas de aviso e alerta do país. Não é necessária qualquer ação por parte do público. [URL]
Tsunami Warning	[SENDING AGENCY]: Um ALERTA DE MAREMOTO está em vigor para [LOCATION] até [TIME]. Uma série de ondas poderosas e correntes fortes podem afetar o litoral perto de você. Você está em perigo. Afaste-se das águas costeiras. Vá imediatamente para um local elevado ou para o interior. Mantenha-se longe do litoral até as autoridades locais informarem que é seguro voltar. [URL]
Earthquake Warning	TERREMOTO DETECTADO! Abaixe-se, proteja-se e aguarde. [SENDING AGENCY] [URL]
Boil Water Advisory	[SENDING AGENCY]: Um ALERTA PARA A FERVURA DE ÁGUA está em vigor para [LOCATION] até [TIME]. A água na sua região pode deixá-lo doente. Use água engarrafada, se disponível. Não beba, cozinhe, escove os dentes ou limpe a casa com água da torneira ou água filtrada até ser fervido. Deixe a água fervor por TRÊS MINUTOS. Deixe a água esfriar antes de usar. Não use gelo feito com água que não tenha sido fervida. Se você usa fórmula para alimentar seu filho, use fórmula pronta para consumo. Certifique-se de que os animais de estimação não bebam água que não tenha sido fervida. [URL]
911 Outage Alert	[SENDING AGENCY]: Um ALERTA DE INTERRUPÇÃO DO SERVIÇO 9-1-1 está em vigor para [LOCATION]. Em caso de emergência, entre em contato com a polícia, bombeiros, médicos ou outros serviços de emergência diretamente por meio dos seus números de telefone locais. É possível você não conseguir ajuda ao discar 9-1-1. [URL]
Avalanche Warning	[SENDING AGENCY]: Um ALERTA DE AVALANCHE está em vigor para [LOCATION] até [TIME]. Neve instável e em movimento rápido pode ocorrer rapidamente, causando ferimentos ou morte e pode bloquear estradas e danificar propriedades nas áreas afetadas. SAIA desta área. NÃO retorne à área após a evacuação até receber instruções das autoridades locais. Não é recomendado viajar na região. As avalanches podem percorrer longas distâncias. [URL]

Fire Warning	[SENDING AGENCY]: Um AVISO DE INCÊNDIO está em vigor para [LOCATION] até [TIME]. Evacue sua família e animais de estimação agora, não demore. A visibilidade na região estará prejudicada e as estradas podem ficar bloqueadas. Se você não sair agora, você pode ficar preso, ferido ou morto. SAIA das áreas próximas de [LOCATION]. Espere por visibilidade reduzida, fumaça pesada e dificuldade para respirar. Tenha cuidado ao dirigir. Fique atento ao pessoal de segurança pública que atua na região e siga as suas instruções. [URL]
Hazardous Materials Warning	[SENDING AGENCY]: Houve um vazamento de SUBSTÂNCIAS PERIGOSAS às [TIME] em [LOCATION]. A exposição pode causar dificuldade para respirar, perda de coordenação, sensação de queimação nos olhos, nariz, garganta ou pulmões, náuseas e, possivelmente, morte. SAIA das regiões próximas de [LOCATION]. Se estiver CONDUZINDO UM VEÍCULO para evacuar a área, mantenha os vidros e saídas de ar do carro fechados. NÃO retorne à área após a evacuação até receber instruções das autoridades locais. [URL]

Flash Flood Emergency	[SENDING AGENCY]: В [LOCATION] объявлено ЭКСТРЕННОЕ ПРЕДУПРЕЖДЕНИЕ о ВНЕЗАПНОМ НАВОДНЕНИИ (действует до [TIME]). Это явление крайне опасно для жизни. Не совершайте поездок, если вы не эвакуируетесь из района, который может подвергнуться затоплению, самостоятельно или по приказу об эвакуации. [URL]
Flash Flood Warning	[SENDING AGENCY]: В [LOCATION] до [TIME] объявлено ПРЕДУПРЕЖДЕНИЕ о ВНЕЗАПНОМ НАВОДНЕНИИ. Это явление опасно для жизни. Не совершайте поездок, если вы не эвакуируетесь из района, который может подвергнуться затоплению, самостоятельно или по приказу об эвакуации. [URL]
Severe Thunderstorm Warning	[SENDING AGENCY]: В [LOCATION] до [TIME] объявлено ПРЕДУПРЕЖДЕНИЕ о СИЛЬНОЙ ГРОЗЕ с РАЗРУШИТЕЛЬНЫМИ порывами ветра скоростью 129 км/ч. Укройтесь в устойчивом здании и не подходите к окнам. Если вы не в надежном укрытии, столкновение с летящими объектами может оказаться смертельным. [URL]
Snow Squall Warning	[SENDING AGENCY]: В [LOCATION] до [TIME] объявлено ПРЕДУПРЕЖДЕНИЕ О ШКВАЛИСТОМ СНЕГЕ. По возможности отложите поездки. В противном случае снизьте скорость передвижения. Возможно резкое ухудшение видимости до нулевой, а также обледенение дорог из-за сильного снегопада. [URL]
Dust Storm Warning	[SENDING AGENCY]: В [LOCATION] до [TIME] объявлено ПРЕДУПРЕЖДЕНИЕ о ПЫЛЕВОЙ БУРЕ. Возможно резкое ухудшение видимости до нулевой. Съездите на обочину, чтобы остаться в живых! При ухудшении видимости съездите на обочину дороги и припаркуйте транспортное средство. Выключите фары и заберите ногу с тормоза. Младенцам, пожилым людям и лицам, испытывающим трудности с дыханием, может потребоваться помощь. [URL]

Hurricane Warning	[SENDING AGENCY]: В [LOCATION] до [TIME] объявлено ПРЕДУПРЕЖДЕНИЕ ОБ УРАГАНЕ с опасными и разрушительными порывами ветра. Это предупреждение разослано за 36 часов до начала чрезвычайной ситуации. Примите меры по защите своей жизни и собственности. Подготовьте еду, питьевую воду, наличные деньги, топливо и медикаменты на срок более 3 дней. СЛЕДУЙТЕ ИНСТРУКЦИЯМ МЕСТНЫХ ВЛАСТЕЙ. [URL]
Storm Surge Warning	[SENDING AGENCY]: В [LOCATION] объявлено ПРЕДУПРЕЖДЕНИЕ о штормовом приливе и существует риск опасного для жизни подтопления до [TIME]. Это предупреждение разослано за 36 часов до начала чрезвычайной ситуации. Примите меры по защите своей жизни и собственности. Если в вашем районе действует приказ об эвакуации, следуйте ему, чтобы не утонуть или не оказаться вне досягаемости экстренных служб. [URL]
Extreme Wind Warning	[SENDING AGENCY]: В [LOCATION] до [TIME] объявлено ПРЕДУПРЕЖДЕНИЕ ОБ УРАГАННОМ ВЕТРЕ с опасными для жизни порывами. НЕМЕДЛЕННО укройтесь во внутреннем помещении устойчивого здания и оставайтесь вдали от окон. Защитите голову от летящих объектов. НЕ ВЫХОДИТЕ наружу, если ветер стих! Опасные для жизни порывы ветра могут возобновиться в любой момент. [URL]
Test Alert	ЭТО ТЕСТОВОЕ ПРЕДУПРЕЖДЕНИЕ от Национальной беспроводной системы аварийного оповещения, отправленное [SENDING AGENCY]. Его цель — убедиться, что оповещения и предупреждения можно получить на уровне страны, штата, района, резервации и других территорий, улучшить систему рассылки предупреждений и оценить ее эффективность. От населения не требуется никаких действий. [URL]
Tsunami Warning	[SENDING AGENCY]: В [LOCATION] до [TIME] объявлено ПРЕДУПРЕЖДЕНИЕ о цунами до [TIME]. Серия мощных волн и сильных течений может достичь побережья в зоне, где вы находитесь. Вы в опасности. Покиньте территорию рядом с побережьем и перейдите на возвышенности или удаленные от воды зоны. Не приближайтесь к побережью до тех пор, пока местные власти не подтвердят, что это безопасно. [URL]
Earthquake Warning	ОБНАРУЖЕНО ЗЕМЛЕТРЯСЕНИЕ. Опуститесь на четвереньки, прикройте голову и держитесь за какую-либо устойчивую конструкцию. Защитите себя. [SENDING AGENCY] [URL]
Boil Water Advisory	[SENDING AGENCY]: В [LOCATION] необходимо ОБЯЗАТЕЛЬНО КИПЯТИТЬ ВОДУ (предупреждение действует до [TIME]). Вода в вашем районе может вызвать проблемы со здоровьем. По возможности используйте бутилированную воду. Не используйте воду из крана или фильтра для питья, готовки, чистки зубов или уборки до того, как прокипятите ее. Кипятите воду в течение ТРЕХ МИНУТ. Дайте воде остить перед применением. Не используйте лед из некипяченой воды. Если вы кормите грудного ребенка смесью, используйте готовые смеси. Не давайте домашним животным пить некипяченую воду. [URL]

911 Outage Alert	[SENDING AGENCY]: В [LOCATION] НЕДОСТУПЕН НОМЕР 9-1-1. При возникновении чрезвычайной ситуации вызывайте полицию, пожарных, скорую помощь или другие экстренные службы по местным телефонным номерам. Если вы наберете 9-1-1, помощь может не прибыть. [URL]
Avalanche Warning	[SENDING AGENCY]: В [LOCATION] объявлено ПРЕДУПРЕЖДЕНИЕ о СХОДЕ ЛАВИН до [TIME]. Быстрый сход нестабильных масс снега может привести к травмам или гибели, заблокировать дороги и повредить здания. ПОКИНЬТЕ территорию рядом с [LOCATION]. После эвакуации НЕ ВОЗВРАЩАЙТЕСЬ в эту зону до тех пор, пока местные власти не подтвердят, что это безопасно. Передвижение в этой зоне не рекомендуется, так как лавины могут преодолевать большие расстояния. [URL]
Fire Warning	[SENDING AGENCY] предупреждает о ПРИРОДНОМ ПОЖАРЕ в зоне [LOCATION] (предупреждение действует до [TIME]). Немедленно эвакуируйтесь со своей семьей и домашними животными. Ожидается ухудшение видимости и пробки на дорогах. Если вы не покинете эту зону, вы рискуете быть изолированными, получить травму или погибнуть. ПОКИНЬТЕ территорию рядом с [LOCATION]. Возможны ухудшение видимости, сильная задымленность и проблемы с дыханием. Соблюдайте осторожность при вождении транспортного средства. Найдите сотрудников экстренных служб в зоне, где вы находитесь, и следуйте их указаниям. [URL]
Hazardous Materials Warning	[SENDING AGENCY]: в зоне [LOCATION] произошел ВЫБРОС ОПАСНЫХ МАТЕРИАЛОВ. При воздействии этих материалов возможны проблемы с дыханием, нарушение координации движений, жжение в глазах, носу, горле или легких, а также тошнота и даже смерть. ПОКИНЬТЕ территорию рядом с [LOCATION]. Если вы эвакуируетесь НА ТРАНСПОРТНОМ СРЕДСТВЕ, не открывайте окна и не используйте вентиляционную систему. После эвакуации НЕ ВОЗВРАЩАЙТЕСЬ в зону ЧС до тех пор, пока местные власти не подтвердят, что это безопасно. [URL]

Esta advertencia se emite hasta 36 horas antes de que las condiciones peligrosas comiencen. Tome medidas para proteger vidas y propiedad. Tenga alimentos, agua, dinero en efectivo, combustible y medicamentos para un mínimo de 3 días. SIGA LAS INSTRUCCIONES DE LAS AUTORIDADES LOCALES. [URL]

Storm Surge Warning	[SENDING AGENCY]: UNA ADVERTENCIA DE MAREJADA CICLÓNICA está en efecto para [LOCATION] hasta [TIME] por peligro de inundaciones con riesgo de muerte. Esta advertencia se emite hasta 36 horas antes de que las condiciones peligrosas comiencen. Tome medidas para proteger vidas y propiedad. Siga las órdenes de evacuación si se emiten para esta área, para evitar ahogarse o quedar aislado de los servicios de emergencia. [URL]
Extreme Wind Warning	[SENDING AGENCY]: Una ADVERTENCIA DE VIENTOS EXTREMADAMENTE FUERTES está en efecto para [LOCATION] hasta [TIME] por peligro inmediato de fuertes vientos con riesgo de muerte. Resguárdese AHORA en una habitación interior de un edificio resistente, lejos de las ventanas. Proteja su cabeza de los escombros. ¡NO salga aunque el viento se calme! Los vientos pronto volverán a ser peligrosos. [URL]
Test Alert	ESTA ES UNA PRUEBA del sistema nacional de alertas de emergencia inalámbricas (National Wireless Emergency Alert System) enviada por [SENDING AGENCY]. El propósito es mantener y mejorar las capacidades de alerta y advertencia a nivel federal, estatal, local, Tribal y territorial, y evaluar la capacidad de las alertas y advertencias públicas a nivel nacional. No se requiere ninguna acción por parte del público. [URL]
Tsunami Warning	[SENDING AGENCY]: UNA ADVERTENCIA DE TSUNAMI para [LOCATION] está en efecto hasta [TIME]. Una serie de grandes olas y fuertes corrientes pueden afectar las costas cercanas. Usted está en peligro. Aléjese ahora mismo de las aguas costeras y diríjase a terrenos elevados o hacia el interior. Manténgase alejado de la costa hasta que las autoridades le avisen que puede regresar sin peligro. [URL]
Earthquake Warning	¡TERREMOTO DETECTADO! Agáchese, cúbrase, agárrese, protójase. [SENDING AGENCY] [URL]
Boil Water Advisory	[SENDING AGENCY]: ¡ALERTA! HIerva el agua en [LOCATION] hasta [TIME]. El agua en su comunidad puede enfermarle. Use agua embotellada si está disponible. No beba agua del grifo, aunque esté filtrada; no la use para cocinar o lavarse los dientes ni para limpiar su hogar. Hierva el agua por TRES MINUTOS por lo menos. Enfíe el agua antes de usarla. No use hielo preparado con agua sin hervir. Si usa leche preparada para su bebé, use la que viene lista (no la que requiere agua). Asegúrese de que sus mascotas no beban agua sin hervir. [URL]
911 Outage Alert	[SENDING AGENCY]: UNA ALERTA POR INTERRUPCIÓN DE LOS SERVICIOS 9-1-1 está en efecto en [LOCATION]. En caso de emergencia, comuníquese directamente con la policía, los bomberos, los servicios médicos u otros servicios de emergencia, llamando a sus números locales. Si llama al 9-1-1, es posible que no reciba ayuda. [URL]
Avalanche Warning	[SENDING AGENCY]: UNA ADVERTENCIA DE AVALANCHA para [LOCATION] está en efecto hasta [TIME]. El rápido movimiento de nieve inestable puede ocurrir repentinamente, con peligro de daño físico o muerte, y puede bloquear caminos y dañar propiedades en las áreas afectadas. ABANDONE las áreas cercanas a [LOCATION]. NO vuelva al área tras la evacuación hasta que las autoridades locales se lo indiquen. No se recomienda viajar en el área. Las avalanchas pueden alcanzar grandes distancias. [URL]

Fire Warning	[SENDING AGENCY] Una ADVERTENCIA DE INCENDIO en [LOCATION] está en efecto hasta [TIME]. Evacúe a su familia y mascotas ahora, sin demoras. La visibilidad del área disminuirá y los caminos pueden bloquearse. Si no sale ahora, podría quedar atrapado, resultar herido o morir. ABANDONE las áreas cercanas a [LOCATION]. Prepárese para una reducción de la visibilidad, denso humo y dificultad para respirar. Maneje con cuidado. Preste atención al personal de seguridad pública en el área y siga sus instrucciones. [URL]
Hazardous Materials Warning	[SENDING AGENCY]: UNA EMANACIÓN DE SUSTANCIAS PELIGROSAS ha ocurrido a las [TIME] en [LOCATION]. La exposición puede causar dificultades respiratorias, pérdida de coordinación, sensación de ardor en los ojos, nariz, garganta o pulmones, náusea y riesgo de muerte. ABANDONE las áreas cercanas a [LOCATION]. SI CONDUCE para evacuar el área, mantenga el vehículo con las ventanas y ventilaciones cerradas. NO VUELVA al área tras la evacuación a menos que las autoridades locales se lo indiquen. [URL]
