

Christmas Stocking

Requirements

- 1 fat quarter of main stocking fabric
- 1 fat eighth of fabric for the Cuff
- 1 fat quarter of lining fabric

General Directions

Read through all instructions before beginning. Sew all seams with a $\frac{1}{4}$ inch seam allowance. Instructions are for fabric 44 inches wide. Cut all fabrics the width of fabric (WOF) unless otherwise stated. All measurements are in inches.

Paper Templates

Join paper pattern where indicated and cut out. Seam allowances have been included in the pattern.

Making the Stocking

- Fold Main fabric so that right sides are facing. Place the paper template on the fabric, pin in place and cut out.
- Repeat for the lining.
- Cut 2 rectangles $5 \frac{5}{8} \times 7 \frac{1}{2}$ from the Cuff Fabric.
- Make a stocking hanger using a left over piece of fabric. Cut a rectangle 6×2 . Fold in $\frac{1}{4}$ inch on each long side press then fold together lengthways and stitch along folded edge.

Sewing Instructions

- Place main stockings right sides together and sew around edges leaving the top edge open. Clip all the curved edges. Turn right side out press.
- Join each Cuff rectangle to the top of the lining stocking to make it longer.
- Place the 2 lining shapes right sides together.
- Fold the stocking hanger in half and place the 2 raw edges of the stocking hanger inside the lining piece where the cuff and lining meet. The fold will be inside the stocking shape. Pin in place.
- Place lining shapes right sides together and sew around edge leaving a gap in the side seams where indicated on the pattern and leaving the top edge open. Do not turn.
- Place stocking inside lining and pin the top edge of both pieces right sides together. Sew around the top edge, turn through lining side seam opening.
- Push the lining into stocking. The lining will be longer than the main fabric. Fold the cuff fabric over the main until the stocking hanger is at the top.

Your stocking is now complete!
