After Ralph completed a tour of duty in the Army, he started his career in computers in Washington, D.C. This became the platform for his progression to Foreign Service. Elaine was a woman of many talents, a wonderful cook, an outstanding baker, candy and ice cream maker. She could sew circles around a professional seamstress. She was always on call as a nurse to her accident prone children and even to a neighbor kid or two. She was forced into being a zookeeper with the wild variety of creatures that were brought home. She can also be remembered drinking coffee and talking to one of her many friends.

Elaine is what kept her large family together. She provided wisdom and guidance throughout the years. She was the hub of the family, passing information from one person to another to keep them in touch, no matter where they were. She was a wonderful wife and mother that is beyond compare. She and all her knowledge and skills will be greatly missed, along with her jolly, ornery laugh. She did a great job and her family will be just fine because of her and dad.

CLASSMATE PERSONALS

FRAUENHOLZ, Lowell H. “Lowie”

Lowie and Carol Anne have two children and two grandchildren.
AA from Cabot College, BS California State Univ.

Jack MULLEY and I joined the Navy in January, 1956. I served seven years as an Electronics Technician and Nuclear Reactor technician. I was stationed on Midway Island, several other ships and stations, and two years in Idaho for Nuclear Power Training and instructor duty. My Navy career ended after putting the USS Long Beach CGN-9, a nuclear powered guided missile cruiser, in commission and serving aboard for two years.

In 1963, I moved to Livermore, California, and worked for General Electric Co., Nuclear Energy Division for 17 years, starting as a Nuclear Reactor Operator, and finishing as a Nuclear Products Program Manager. While with GE, I obtained a BS degree from California State University - Hayward, in 1971.

We moved to Mackay, Idaho, in 1985, Carol's hometown. Here I completed a rewarding nuclear career, taking early retirement after ten years at the Idaho National Engineering Laboratory (now the Idaho National Laboratory) as Nuclear Safety Manager at a Nuclear Fuel Processing Facility.

I have been fully retired since February 2001. We are now living in this central Idaho city of Mackay with 547 souls, nestled between 11,000 ft. mountain ranges, some 100 miles from the nearest stoplight. Our county is larger than Connecticut but has only 4,238 people. We are active in local historical activities, church, volunteer government boards and committees, American Legion, and I am the “Voice of the Valley”, the announcer for any public events requiring a strong voice and microphone, including parades, bazaars, rodeos, races, and bingo. Carol is involved in most, but has her own activities.

Personally, my family has been the most significant aspect of my life. Professionally, my Navy years, completing college, and a successful technical career were satisfying accomplishments.

My most satisfying rewards have been the births of my five children; my marriage of 49 years to the same man; and that our four living children are happy, responsible adults.

Hobbies: I do work for my church and I am a trustee volunteer for AARP Tax Service. I also help with organizing projects for a local nursing home.

Shows at this time included many Merv Griffin shows, and Laugh In. He was the warm-up act for Glenn Campbell. One song he wrote and recorded, "Daisy a Day", was a hit. At the age of 45 he died while flying his plane, it went down in Maine.

I went back to teaching art in the Junior High in Farmington. I married my second husband, our accountant, Sturges Butler. However, I retained my name as Strunk.

In 1983 we bought an Inn and 10 cabins on a near-by lake for a summer business. I graduated from the U of Pittsburgh School of Nursing in 1960. After working for five years as a staff nurse, head nurse and teacher of maternity nursing at Allegheny General Hospital, I returned to graduate school. Following graduate school, I taught 32 years at Pitt School of Nursing. I developed, taught and directed the nurse practitioner programs the last 25 years at Pitt. I retired early in 1998.

In 1986, I married Albert Kobert, who worked as a repairman of coin-operated vending machines. Al retired shortly after we were married. For 17 years, we lived in O'Hara Township, but recently moved to a Continuing Care Retirement Community near Saxonburg in Butler County. Al and I enjoy traveling and community and church activities, as well as activities here at our retirement community.

Professor of Chemistry, Univ. of California San Diego.
Marilyn - PhD Staff Assistant, Salk Institute.

San Diego continues to improve as a place to live. A broad, sandy beach is a mile from our house, even though I never go into the water, and I have not yet become a true Californian, since I wear a coat and tie even as I bicycle to work. Much of my leisure time is spent gardening, which rewards with fruits (citrus, guava, persimmon, figs, loquat, raspberries, passion fruit, mango) and flowers (orchids, roses, gardenia, jasmine, camellia). Year-round we play weekend tennis. I enjoy my job, teaching organic chemistry to a class of 400, or a graduate class, guiding my students in basic research, and writing papers. Marilyn's job is similar, but only research, and in neuroendocrinology, far removed from her PhD in computational chemistry. Neither of us has plans to retire.

PERRIN...

Ten years ago, my lab moved to a new building. My office has a nice view of the coastline from the fifth floor. The real benefit is the FM reception, pulling in classical-music stations from Los Angeles. We enjoy the chamber music, symphony, opera, theater, and restaurant scenes here.

The jet plane has made it possible to travel more widely than I would ever have dreamt possible in high school. Academe has permitted sabbaticals: a year in Sweden, a month each in Copenhagen and Padua, and four separate month-long stays in Paris. Besides many trips around the U.S., international conferences have taken us to York and Guilford, Belgium, Japan, Regensburg, Mexico City and Cancun, Israel and Egypt (two days after the invasion of Kuwait), Brazil (three times), Venezuela, Berlin, Sicily, Korea, Uppsala, Turin, and most recently China. Add-on excursions included Britain, Italian hill towns, the Riviera, the Dalmatian and Amalfi coasts, Sardinia and Corsica, Prague/Bratislava/Budapest/Vienna, a Baltic cruise to Tallinn and St. Petersburg, and a cruise along the coast and fjords of Norway. Marilyn took me to conferences in Sydney and Munster, and we went purely as tourists to Italy, Spain, Turkey, Costa Rica, and Hong Kong.

Most satisfying accomplishment - my marriage.

Hobbies: Gardening, travel and international cuisine.

RAVEY/Johnson, Rachel B.

Rachel and Carl have two daughters, one grandson.
Hood College, MA from U of Edinburg, Scotland, plus a third college degree.

I was a teacher at a Community College. My most life-altering event was the death of my beloved mother early in 5th grade (Miss Dressing's class). I went wild for a while, then I managed to attend and graduate from Hood College and earn my first degree. I married Royal Cleaves Johnson II, a college math teacher whose name I honor and have kept for my children's sake.

I then went on to graduate school and earned a MA in English Literature, getting my final hours from U of Edinburg in Scotland. I had two daughters, both born by the Lamaze Method with Daddy present. We bought an island in Canada and built on it without sacrificing any trees. Then moved to a big country place and got into the really high-adventure stuff. I also became an activist.

I earned my third college degree after spending a summer in Africa working in a "bush" hospital and climbing Mt. Kilimanjaro when it was still deeply snow-packed. I worked as a therapist, social worker, college teacher and camp staffer in the summer. I married The Rev. Carl F. Pattison nineteen years ago (WHY did he marry such a radical???) and continue to live in the country and plan the next adventure. I will say that I have had major ups and downs. Sometimes I was just hanging on by my toes, and other times, I was sailing. My philosophy is "Carpe Diem", and my favorite quote is from Dr. Suess' "The Lorax" "...I speak for the trees, for the trees have no tongues."

With more freedom than ever in our lives and a great desire for change, we moved a year ago. Our home is now Greenwood, Indiana, southwest of Indianapolis and not far from Don's boyhood home. My sixth life has begun as a Hoosier and I am loving it.

My greatest challenge and accomplishment is being a parent for 23 years of a multiple-handicapped child. I learned from that experience that material accomplishments fall far short of the things that are most important in life -- love, kindness, patience, courage and empathy.

My wish for you is that in all the challenges of your lives, you will be able to see new beginnings. I have! I may miss all of you as we are usually in California during the month of August.

Upon graduation Ruth attended Union College in Barbourville, KY. During this time she met and married Daniel Smith from Corbin, KY but eventually changed her name back to Scheib. Following graduation from Union College, Ruth attended the Pre-Med program at the University of Kentucky. She also worked at Children's Hospital in Cincinnati, OH to further her education. Ruth had written several medical papers that were published in medical journals.

According to her brother, Jerry, when she was younger she liked to ride horses and was displaying her riding skills by riding in a stream one winter in Pennsylvania when the horse decided to lie down in the stream. At another time, Ruth was driving down Washington Boulevard and observed a male driver pulled over to the side of the road with a flat tire. Ruth stopped and changed the tire for that thankful driver.

Ruth also went to the dirt track races with her best friend and Classmate, Luise WALLY. They even built a still in her basement with the help of Ruth's father and cooked corn mash that was noticeable all over Virginia Avenue. Luise and Ruth remained close friends by phone. Rachel RAVEY, friend and Classmate, tells of how "We swam almost daily in the Allegheny River near Blawnox, swimming out in front of the huge barges, seeing if we could get across the river before they ran us down. We swam near dams and falls and swam at night. We both had a high interest in medicine." Ruth was a leader - friends of hers used to gather down at her house at noon and after school where she talked and they listened. I always looked up to her, even though she was quiet in school and with many other people. She seemed to KNOW a lot of stuff, far beyond her years. Ruth was the very sole of adventure and curiosity.

From the day I left Blawnox, I spent the rest of my time working my way west. After living in Oklahoma, Tennessee, Mississippi, Maryland, Virginia, New Jersey, Nebraska, Indiana and California, I decided to settle down with my five kids and make my home. After my divorce, I met Sharon and we have been married for 20 years. Ten years ago, we moved to Arizona.

I am currently retired but have worked in the electronics field over the years in field service. A few years ago, I got involved in woodworking (a hobby that became a business) and traveled around the west attending craft shows and selling the products I made.

Hobbies: Woodworking and raising animals. We always seem to have a houseful of animals. We are currently down to three dogs and one horse. I have enjoyed camping with the horses over the years. I thoroughly enjoy traveling and especially going on cruises. Sharon wants to visit all the states in the United States, and we only have ten left to go.

WYSOCKI/Lenosky, Patricia K. "Patty"

Patty and Harry have three children and three grandchildren.
Nurse (Retired).
Patty graduated from Allegheny General School of Nursing.

I've worked in every phase of nursing except pediatrics. I loved ICU and geriatrics the best. I had to go on disability when I was 58 and then went on to complete retirement at 62 because of fibromyalgia.

My most satisfying accomplishments were graduating from nurse's training; giving birth to my babies and watching my grandchildren being born.

Hobbies: There isn't much I can do anymore. I love to read, visit family when I can, decorate our house, and walk Sadie, our dog, around the pond.

ZOERB/King, Carol J.

Carol married classmate Jim KING and they have three children and six grandchildren.
Registered Nurse (Retired).
Jim - General Electric (Retired).

After moving to Utica, New York, we started camping. Our family has been to all the lower 48 states, most of Canada, Mexico and Alaska. It is a great way to see this beautiful country of ours. We retired in 1999 to Cape Cod and built our retirement home. We moved here to hopefully get away from the cold, snowy winters of Utica. I remain active in a nursing group in our area and also with the Cape Cod Hospital Auxiliary.

Margaret Carr	Ms. McCrum	She was a no nonsense “Character” and a good teacher.
	Mr. Berkheimer	He had an enthusiastic approach to chemistry.
	What would you have done differently?	I probably would not do much differently, except that I don’t think I was as outgoing as I could have been during my Junior and Senior years. Changing schools after 10 th grade was quite a change.

Gene Consolo	Ms. Kiley	She was demanding but fair. It was good to see her at the AHS Grand Reunion.

Kathy Dearing	Ms. Kiley	She had the ability to make English interesting, even the grammar.
	Mr. Dahl	He had a “choice” sense of humor.
	What would you have done differently?	Very little! I look back on my five years at AHS and remember them very fondly.
Milt Ertel	Ms. Kiley	She really worked hard with me to get a passing grade in English.
	Mr. Wheeler	Mechanical drawing was the only class where I had straight “A’s”.
	What would you have done differently?	Nothing! Don’t look back. Just move ahead.
Betty Erwin	Ms. McCrum	She taught me algebra by intimidation and embarrassment, but it worked.
	Ms. Lutz Mr. Lindsay	They were good classroom managers and knew their subjects.
	Mr. Fleming	He always had his hands full with the band, but that was a fun class and the performances (especially at football games) were memorable.
	What would you have done differently?	Those were GOOD days! I couldn’t say I would have had more fun, because I probably wouldn’t have lived to tell it. There were lots of activities, parties, and fun times, and the longer I think about those days the more I can remember. We all took ourselves very seriously, but that’s the name of the game for those high school years. My family drugstore connection was good/bad news for me. All those experiences and relationships formed a good foundation for me for the next 50 years. I’m grateful for those AHS years.

Lowie Frauenholz	Ms. Kiley	She demanded I learn how to write; this was a significant factor in advancing my career.
	Mr. Berkheimer	He stirred the science and engineering in my blood, and had patience with the clowns in class.
	What would you have done differently?	I would have learned a lot more about getting into college and programs like ROTC.
Joe Gibbs	Ms. McCrum	She made her expectations yours. Sometimes it was less than our own expectations and sometimes more. There was nothing you could do about it either way. She was not fair; she had her favorites, but life is not fair and she taught me how to handle that.
	Mr. Berkheimer	He could teach to all his students despite the chasm between those exceptional classmates gifted in science and the rest of us. I learned!
	What would you have done differently?	Nothing!
Judy Gillespie	What would you have done differently?	Not much! Those were great days.
Carol Greene	Ms. Kiley	She made her classes interesting.
	Mr. Dahl	I loved history and I could finish other work when he reminisced.
	What would you have done differently?	I would like to think that I would have gotten more involved and studied harder. (But maybe not!)
Bob Grimes	Ms. Burnite	She made me realize that the arts could be fun.
	Mr. Berkheimer	He made chemistry and physics a challenge. (Even though Dan Thalimer and I used to sit in the last row and play for a penny a point on the difference in our quiz scores.)

	Mr. Berkheimer	He made chemistry exciting, had a positive attitude and believed that everyone could succeed.
	What would you have done differently?	If I could go back to those days, I would get more involved in the after-school activities and get to know my classmates better.
Rege Kane	-----	I never had a favorite teacher, but I should have paid more attention in Ms. Klug's class since the whole world is living on the keyboard now. A few Spanish classes wouldn't have hurt either.

	Mr. Lindsay	He was my piano teacher from 7 th through 9 th grades. He also coached me in basketball and football. He would take me with him to scout the opposing football team after my Saturday morning piano lesson when I was in 7 th and 8 th grades. That was great fun for a young kid.

	Mr. Berkheimer	His classes were fun and he was cute and young.
	What would you have done differently?	I honestly don't know. It might have been fun not to spend so much time with the books, but that was a "Dad" thing.
Barb Moroff	Ms. Kiley	She is the reason I became an English teacher.
	What would you have done differently?	I don't know that I would change anything if I could. I am quite comfortable with the person I am today.
Pat Mueller	Ms. Kiley Ms. Patterson	They made you really "work" at grammar and literature and I really needed that. I now appreciate the foundation that they each gave us.
	Mr. Dahl	-----
	What would you have done differently?	I guess like most everyone else, I would have heeded my parents' constant "requests" to work harder so that I could achieve more. I know that my parents' "pushing" was the impetus that I needed to get into Carnegie Tech (now Carnegie Mellon) and make the Dean's List a few times.
Shirley Negley	Ms. Klug Mr. Berkheimer	They were both very respectful, fair and good teachers.
	What would you have done differently?	I don't think I would change anything. I would probably make a greater effort to keep in touch with those with whom I was closest.

	Ms. Frey	She took me to my first cave.
	Mr. Berkheimer	He was nice to us and made chemistry interesting. He even took us to an operating steel mill.
	What would you have done differently?	I kind of liked the things I did. I went through a REALLY wild stage in 7 th , 8 th and 9 th grades, where I had adventures. Then I decided I needed to improve myself, so I became a sort of goody-goody and better student. That helped my self-esteem. I think my regret is that I was not more socially conscious and aware of other's needs.
