

# INDEX TO PAPERS IN SUSSEX BIRD REPORTS 1962-2021

Compiled initially by Leonard Manns and published in the 2000 SxBR; updated in 2013 and 2022.

## Notes:

1. A Sussex Bird Report was produced by G des Forges *et al* for the years 1948 to 1961, but consisted primarily of a systematic list with additional brief notes.
2. The Sussex Ornithological Society was formed in 1962 and reports for that year onward have been produced by the Society. It is from these reports that the following list has been compiled.
3. The header year is that to which the Sussex Bird Report relates; the publication is normally one year later.
4. This list does not include references to the annual reports of ringing, regular survey results and annual features such as the arrival and departure dates of common migrants nor usually to short notes and finders accounts of rare species.
